

The book cover features a large, solid red circle in the center. Inside this circle, the title is written in white, bold, serif capital letters. The background of the cover is white, decorated with several curved, parallel lines. These lines are composed of alternating red squares and dark green circles, creating a geometric, almost molecular or lattice-like pattern that flows around the central red circle.

Radiation Chemistry of Monomers, Polymers, and Plastics Joseph Edward Wilson, 1974-01 *Polymer Degradation* W. Schnabel, 1981-12-31 No detailed description available for Polymer Degradation *Radiation Synthesis of Materials and Compounds* Boris Ildusovich Kharisov, Oxana Vasilievna Kharissova, Ubaldo Ortiz Mendez, 2016-04-19 Researchers and engineers working in nuclear laboratories nuclear electric plants and elsewhere in the radiochemical industries need a comprehensive handbook describing all possible radiation chemistry interactions between irradiation and materials the preparation of materials under distinct radiation types the possibility of damage of material **Processing and Finishing of Polymeric Materials, 2 Volume Set** Wiley, 2012-12-03 An authoritative reference on the processing and finishing of polymeric materials for scientists and practitioners Owing to their versatility and wide range of applications polymeric materials are of great commercial importance Manufacturing processes of commercial products are designed to meet the requirements of the final product and are influenced by the physical and chemical properties of the polymeric material used Based on Wiley's renowned Encyclopedia of Polymer Science and Technology Processing and Finishing of Polymeric Materials provides comprehensive up to date details on the latest manufacturing technologies including blending compounding extrusion molding and coating Written by prominent scholars from industry academia and research institutions from around the globe this reference features more than forty selected reprints from the Encyclopedia as well as new contributions providing unparalleled coverage of such topics as Additives Antistatic agents Bleaching Blowing agents Calendaring Casting Coloring processes Dielectric heating Electrospinning Embedding Processing and Finishing of Polymeric Materials is an ideal resource for polymer and materials scientists chemists chemical engineers materials scientists process engineers and consultants and serves as a valuable addition to libraries of chemistry chemical engineering and materials science in industry academia and government **UHMWPE Biomaterials Handbook** Steven M. Kurtz, 2015-09-16 UHMWPE Biomaterials Handbook Third Edition describes the science development properties and application of ultra high molecular weight polyethylene UHMWPE used in artificial joints UHMWPE is now the material of choice for joint replacements and is increasingly being used in fibers for sutures This book is a one stop reference for information on this advanced material covering both introductory topics and the most advanced developments The third edition adds six new chapters on a range of topics including the latest in anti oxidant technologies for stabilizing HXLPE and up to date systematic reviews of the clinical literature for HXLPE in hips and knees The book chronicles the rise and fall of all metal hip implants as well as the increased use of ceramic biomaterials and UHMWPE for this application This book also brings orthopedic researchers and practitioners up to date on the stabilization of UHMWPE with antioxidants as well as the choices of antioxidant available for practitioners The book also thoroughly assesses the clinical performance of HXLPE as well as alternative bearings in knee replacement and UHMWPE articulations with polyether ether ketone PEEK Written and edited

by the top experts in the field of UHMWPE this is the only state of the art reference for professionals researchers and clinicians working with this material The only complete reference for professionals researchers and clinicians working with ultra high molecular weight polyethylene biomaterials technologies for joint replacement and implants New edition includes six new chapters on a wide range of topics including the clinical performance of highly crosslinked polyethylene HXLPE in hip and knee replacement an overview of antioxidant stabilization for UHMWPE and the medical applications of UHMWPE fibers State of the art coverage of the latest UHMWPE technology orthopedic applications biomaterial characterization and engineering aspects from recognized leaders in the field **SPE/ANTEC 2000 Proceedings** Spe,2000-05-05 Volume 2 of the conference proceedings of the SPE Antac on Materials held on the 711 May 2000 in Orlando Florida USA *Radiation Chemistry of Polymers* Ivanov,2023-03-08 Part of the series New Concepts in Polymer Science this volume contains information on the main theoretical and practical problems involved in radiation chemistry of polymers The processes of polymerization and modification of polymers by grafting crosslinking and degradation induced by ionizing radiation are all described as well as the radiation resistance of polymers and their protection from radiation The book also contains applications of radiation chemistry of polymers such as principles of selection of radiation chemical processes for industrial use choice of radiation sources for specific processes modification of textile and film materials by grafting manufacturing of heat shrinkable thermostable and mechanically strong polymer products composites rubber vulcanizates and self adhesive products paints and coatings man made fibres materials for microelectronics and polymer materials for medical purposes

Macromolecules H.G. Elias,2013-11-11 The second edition of this textbook is identical with its fourth German edition and it thus has the same goals precise definition of basic phenomena a broad survey of the whole field integrated representation of chemistry physics and technology and a balanced treatment of facts and comprehension The book thus intends to bridge the gap between the often oversimplified introductory textbooks and the highly specialized texts and monographs that cover only parts of macromolecular science The text intends to survey the whole field of macromolecular science Its organization results from the following considerations The chemical structure of macromolecular compounds should be independent of the method of synthesis at least in the ideal case Part I is thus concerned with the chemical and physical structure of polymers Properties depend on structure Solution properties are thus discussed in Part II solid state properties in Part III There are other reasons for discussing properties before synthesis For example it is difficult to understand equilibrium polymerization without knowledge of solution thermodynamics the gel effect without knowledge of the glass transition temperature etc Part IV treats the principles of macromolecular syntheses and reactions Polymers for Electronic & Photonic Application C. P. Wong,2013-10-22 The most recent advances in the use of polymeric materials by the electronic industry can be found in Polymers for Electronic and Photonic Applications This book provides in depth coverage of photoresist for micro lithography microelectronic encapsulants and packaging insulators dielectrics for multichip packaging

electronic and photonic applications of polymeric materials among many other topics Intended for engineers and scientists who design process and manufacturemicroelectronic components this book will also prove useful for hybrid and systems packaging managers who want to be informed of the very latest developments inthis field Presents most recent advances in the use of polymeric materials by the electronic industry Contributions by foremost experts in the field Additive Manufacturing Technologies Ian Gibson,David Rosen,Brent Stucker,2014-11-26 This book covers in detail the various aspects of joining materials to form parts A conceptual overview of rapid prototyping and layered manufacturing is given beginning with the fundamentals so that readers can get up to speed quickly Unusual and emerging applications such as micro scale manufacturing medical applications aerospace and rapid manufacturing are also discussed This book provides a comprehensive overview of rapid prototyping technologies as well as support technologies such as software systems vacuum casting investment casting plating infiltration and other systems This book also Reflects recent developments and trends and adheres to the ASTM SI and other standards Includes chapters on automotive technology aerospace technology and low cost AM technologies Provides a broad range of technical questions to ensure comprehensive understanding of the concepts covered
