Critical Voices on Special Education Scott B.

Sigmon, 1990-07-05 The authors of this work address special education's most pressing concern: the inappropriate placement into special education programs of millions of students who fall behind or do not conform well enough to the academic or behavioral standards of today's public schools. Too often these students are misdiagnosed as mildly handicapped and are presumed to have some physical or sensory disability. In fact, this formal labeling practice may carry consequences that are not only self-defeating and potentially ruinous for the stigmatized individual pupil but also ultimately threatening to society as a whole. The book includes contemporary discussions about needed institutional change, the shortcomings of practice currently in vogue, and related to the education of the so-called mildly handicapped, and an appeal for new attitudes toward children that recognizes them as individual learners. The authors offer a unique combination of practical solutions to help set the course for more humane, efficacious educational practice with students who have difficulty learning. They discuss preplacement interventions such as teaching learning strategies, effective short-term counseling, and new ways to assess reading for instructional rather than special placement purposes.

Research Issues in

Learning Disabilities Sharon Vaughn, Candace S. Bos, 2012-12-06 In this chapter we described issues in conducting intervention research with students with learning disabilities on the secondary level. We maintained that interventions should be well grounded in theories of learning as well as characterizations of learning disabilities. Pressley Scruggs that they should first be conducted in a series of highly controlled laboratory-like experiments to carefully assess the potential utility of the intervention and that if the intervention is successful in highly controlled settings it should then be evaluated in classroom applications. We maintained that research designs should evolve as the research questions become more applied and that the results of laboratory research should be used to support the findings of classroom applications. Finally, we described several research designs that we have found useful in conducting classroom intervention research. There is a great deal more to conducting intervention research of course than experimental or quasi-experimental design. Intervention strategies likely to be effective must be identified; relevant literature must be reviewed; experimental materials must be developed; and cooperative schools, teachers, parents, and students must be located. Nevertheless, inadequate research designs can invalidate the best and most successful efforts in all of these areas while effective and practical research designs can do much to document the best practices and advance our knowledge of effective interventions with students with learning disabilities.

Antonio Gramsci (Routledge Revivals) Harold

Entwistle, 2009-07-15 Antonio Gramsci is one of the few Marxist theoreticians to have considered the role and nature of education yet paradoxically his revolutionary political and social theory seems at odds with his conservative approach to the content and processes of schooling. This book, originally published in 1979, examines his educational, political, and cultural

writings in an effort to resolve this apparent discrepancy Gramsci's relevance lies in his treatment in the context of his radical political theory of themes which currently exercise modern radical educationists Among the subjects he discusses are the sociology of the curriculum the apparent discontinuity between the culture of school and that of daily life problems of literacy and language in education the role of the state in the provision of education the cultivation of elites and the role of intellectuals the relative functions of authority and spontaneity in education and the ambiguous relationship of these to differing political ideologies particularly Fascism **Disability Studies Quarterly** ,1985 Academic Distinctions James G.
