Radio Noise Spectrum:

The Radio Noise Spectrum Donald Howard Menzel, 1960 This modern era has had many names the golden age the machine age the atomic age the electronic age and so on One further title hitherto unpublicized it eminently deserves the age of noise Man has compounded the natural noise that preceded his existence on the earth until no point on this globe is free from it Even in the desert s hush radio waves pervade the air and provide a source of potential noise The shorter waves escape from the earth and fill interplanetary space with the mingled clamor of FM TV radar and other insistent voices This book deals with the important problem of radio noise its sources whether manmade or natural over the known range of frequencies Certain of these contributions will interest the communicator enabling him to estimate the potential interference from various types of sources Other contributions deal mainly with scientific problems such as the origins and significance of certain characteristic noise radiations The contributors to this book are experts on the various phases of radio noise The individual chapters derive from papers presented at a Conference on Radio Noise held at Harvard College Observatory April 22 1958

Man-made Radio Noise A. D. Spaulding, 1975

The Radio Spectrum Jean-Marc Chaduc, Gérard Pogorel, 2010-01-05 Radio frequencies have become a basic resource for the development of the information society In fact radio waves are a mandatory vehicle in order to carry the message to customers and a truly worldwide communication needs their properties Given the market demands for more and more frequencies means have to be found to share this limited resource most effectively and to continuously improve its efficiency Radio spectrum management is thus a major objective for our modern world This book describes the current tools for spectrum management with their fundamental technical and legal basis It outlines the global evolution of radio services in their different application domains and introduces the actors who contribute to the collective management of the spectrum It also discusses the main questions these actors have to deal with and answer in order to design for the future
