Raffles of the Eastern Isles Charles Edward Wurtzburg, 1984 Whether he was a schemer or a reformer is for a new generation of post colonial historians to decide but as this biography demonstrates there is no denying the considerable record of achievement of the British imperialist Sir Stamford Raffles

The Napoleonic War in the Dutch East Indies, 1999 **Race and British Colonialism in Southeast Asia, 1770-1870**

Gareth Knapman, 2016-10-14 The idea of race played an increasing role in nineteenth century British colonial thought For most of the nineteenth century John Crawfurd towered over British colonial policy in South East Asia being not only a colonial administrator journalist and professional lobbyist but also one of the key racial theorists in the British Empire He approached colonialism as a radical liberal proposing universal voting for all races in British colonies and believing all races should have equal legal rights Yet at the same time he also believed that races represented distinct species of people who were unrelated This book charts the development of Crawfurd s ideas from the brief but dramatic period of British rule in Java to his political campaigns against James Brooke and British rule in Borneo Central to Crawfurd s political battles were the debates he had with his contemporaries such as Stamford Raffles and William Marsden over the importance of race and his broader challenge to universal ideas of history which questioned the racial unity of humanity The book taps into little explored manuscripts newspapers and writings to uncover the complexity of a leading nineteenth century political and racial thinker whose actions and ideas provide a new view of British liberal colonial and racial thought

Singapore River Stephen Dobbs, 2013-11-11 For most of its modern history to speak of Singapore was to speak of the Singapore River physical centre of the city and site of the greater part of the colony s entrepot trade The river has been transformed over the last 25 years from a polluted industrial sewer choked with traffic to a clean placid waterway that forms the centrepiece of Singapore s financial civic and entertainment districts This transformation symbolizes the city state s efforts to remake itself for the 21st century Stephen Dobbs sets out the history of this waterway and of the people who made it their home and workplace He describes the tidal swamp in the early days of the British settlement where merchants ignored Raffles much vaunted city plan and built their businesses on the limited high ground along the marshy riverbanks Later even as the long distance shipping moved to new port facilities elsewhere on the island the river remained the base for a large regional trade and

boatmen and businessmen struggled to cope with silting over crowding and bridges that were too low to be passed at high tide Looking at the post war years Dobbs zeros in on the boatmen who carried goods between the godownse or warehouses along the river and the freighters lying at anchor in the roads Despite its pollution the river remained home to a vital community of coolies and tally clerks and the tumultuous urban life that swirled around them Today the waterfront community has been relocated The shophouses and warehouses along the river are now chic cafes and upmarket restaurants fish have returned to the Singapore River and urban dwellers stroll on walks along the river s edge Blending social history geography economic history and urban studies this book will be of interest to anyone wishing to understand Singapore s many transformations during the past two centuries
