

A steam locomotive, dark in color with a red buffer beam, is pulling a passenger train through a landscape. The train is moving away from the viewer along a set of tracks that recede into the distance. The sky is filled with large, white, puffy clouds against a blue background. The overall scene is a classic representation of railway travel.

Parthasarathy,Neha Sami,Bing Zhang,2025-10-01 The ten essays in *Future Challenges of Cities in Asia*

engage with some of the most critical urban questions of the near future across Asia These comprise socio economic and cultural transitions as a result of urbanization environmental challenges especially questions of climate change natural disasters and environmental justice and the challenges of urban infrastructure built form and new emerging types of urban settlements The essays demonstrate that it is increasingly difficult to conceptualize the urban as one particular type of settlement Rather it would be more accurate to say that the urban characterizes a global transition in the way we are beginning to think about settlements This book is of interest not only to researchers interested in comparative and interdisciplinary research but also to urban practitioners more broadly illustrating through concrete cases the challenges that urban regions in Asia and beyond are facing and the various opportunities that exist for dealing with these challenges

Transport Policy: Learning Lessons from History Colin Divall, Julian Hine, 2017-05-15 The key aim of this volume is to demonstrate ways in which an understanding of history can be used to inform present day transport and mobility policies This is not to say that history repeats itself or that every contemporary transport dilemma has an historical counterpart rather the contributors to this book argue that in many contexts of transport planning a better understanding of the context and consequences of past decisions and processes could lead to more effective policy decisions Collectively the authors explore the ways in which the methods and approaches of historical research may be applied to contemporary transport and policy issues across a wide range of transport modes and contexts By linking two bodies of academic research that for the most part remain separate this volume helps to inform current transport and mobility policies and to stimulate innovative new research that links studies of both past and present mobilities
