Rainbowfishes of Australia and Papua New Guinea Gerald R. Allen, Norbert J. Cross, 1982 *Rainbowfishes of Australia and Papua New Guinea* Gerald R. Allen, Norbert J. Cross, 1982 Maps line drawings color photographs and text describe eight genera of rainbowfishes including fishes for the aquarium [The Sea and Freshwater Fishes of Australia & New Guinea](#) G. H. Jennings, 1997 **Freshwater Fishes of Australia - 2** Gunther Schmida, 2016-07-18 Based on over 60 years experience this book is the most comprehensive record of all currently known Australian rainbowfish and blue eyes as well as most hardyheads and many of their forms The 300 plus images show the fish in their best condition and many of the habitats where they occur The text is informative and kept simple for anyone to understand [Freshwater Fishes of North-Eastern Australia](#) Brad Pusey, Mark Kennard, Angela Arthington, 2004-09-09 Freshwater Fishes of North Eastern Australia provides details of the ecology systematics biogeography and management of 79 species of native fish present in the region It includes detailed information on their identification evolutionary history breeding biology feeding ecology movement patterns macro meso and micro habitat use water quality tolerances conservation status and current threats as well as environmental flow and management needs Based on the results of extensive field surveys and a comprehensive review of existing literature it is designed to assist environmental practitioners and managers to make informed decisions about future management strategies It will also encourage a greater research effort into the region's aquatic fauna by providing a comprehensive resource that enables other researchers to adopt a more quantitative and strategic framework for their research Joint winner of the 2005 Whitley Medal **1994 IUCN Red List of Threatened Animals** World Conservation Monitoring Centre, 1993 Lijst van soorten die bedreigd worden met uitsterven en soorten die zeer schaars voorkomen in het wild [Limnology in Australia](#) P. de Deckker, W.D. Williams, 2012-12-06 Australia is the world's driest inhabited continent Water is our limiting resource It might therefore be thought that our water resources would be the subject of the most intensive study Certain aspects it must be conceded have received much attention notably the availability of water in terms of actual quantity The size of the surface water and the groundwater resource is well understood and indeed receives about as much study as can reasonably be expected in a country with as sparse a population and level of scientific manpower as ours Although the importance of understanding the water resource in terms of quantity is widely accepted what has not been generally appreciated is that for this resource to be available to human society for all the different uses to which it is put it is not sufficient that there exists within easy reach of the end users a certain total volume of water For that water to fulfil its functions for agriculture industry the home recreation biological conservation it must be in a certain state it must conform to certain chemical physical and biological criteria and what has not been sufficiently appreciated in Australian society is that the condition a water is in depends very much on the ecology of the waterbody in which it resides There are waterbodies in the world for example high altitude glacial lakes which are naturally so pristine

that their water could be used for any purpose without treatment

Ecology of Australian Freshwater Fishes Paul Humphries, Keith Walker, 2013-04-10 This edited volume reviews our past and present understanding of the ecology of Australian freshwater fishes It compares patterns and processes in Australia with those on other continents discusses the local relevance of ecological models from the northern hemisphere and considers how best to manage our species and their habitats in the face of current and future threats In view of these challenges the need for redress is urgent The chapters are written by some of our foremost researchers and managers developing themes that underpin our knowledge of the ecology conservation and management of fish and fish habitats For each theme the authors formulate a synthesis of what is known consider the need for new perspectives and identify gaps and opportunities for research monitoring and management The themes have an Australian context but draw upon ideas and principles developed by fish biologists in other parts of the world The science of freshwater fish ecology in Australia has grown rapidly from its roots in natural history and taxonomy This book offers an introduction for students researchers and managers one that the authors hope will carry Australian fish biology and resource management to new levels of understanding *Freshwater Fishes of Australia - 2 - Hardcover* Gunther Schmida, 2016-01-09 This is the most comprehensive volume about Australia's incredibly beautiful and interesting freshwater fishes the rainbowfish blue eyes and hardyheads ever attempted It shows all species of Australian rainbowfish and blue eyes and most of their colour forms known to date as well as almost all hardyheads and their forms The quality colour reproduction of the 311 images is as natural as possible The 26 x 21 cm size of the book in portrait orientation almost A4 allows the images to be large enough to show most species in natural size or larger and all fish are shown in prime condition There are also many habitat shots for those readers not being able to visit these places themselves often showing the type localities the species The text is informative and up to date and deliberately kept simple to be understood by the general public and hopefully inspire interest in these unique fishes A must for all rainbowfish and nature lovers Just click the Preview button to judge yourself

1996 IUCN Red List of Threatened Animals Ulf Gärdenfors, A. J. Stattersfield, International Union for Conservation of Nature and Natural Resources. Species Survival Commission, 1996 The 1994 IUCN Red List of Threatened Animals was a major advance on its predecessors in clarity of layout and amount of information presented This is taken further in the 1996 edition which is also the first global compilation to use the complete new IUCN Red List category system
