Robot Dog:

Digit: Robot Dog Stops Bullying at School Sophia Z. Domogala, 2016-12-17 The story is about a robotic dog named Digit. Digit the robotic dog helps to stop bullying at the Zipper Elementary School by rolling down the hallways in the school monitoring the children. Digit is a special dog because he teaches children not to bully each other in school. Digit carries a red toolbox kit that teaches children about positive behavior, role models, rules and discipline, being kind and helpful to each other, and he teaches children how to deal with problems about bullying in school. Digit teaches children to be friendly, to share, and to say please and thank you. But most of all, he teaches them to have a positive outlook on life. Digit's red toolbox kit also contains special rewards for those children who are well behaved in and out of school. Digit says, "Bullying hurts. It hurts us all. Stop bullying now."

[Your Robot Dog Will Die](#) Arin Greenwood, 2018 In the mid 21st century, dogs are all but extinct. An experiment gone awry caused every canine on Earth to become hyperintelligent. Now the only surviving dogs are relegated to a sanctuary off the coast of Florida: Dog Island. There they are studied in a wild, feral and protected state. And there too, their robot replacements are tested before being sold for mass consumption. Seventeen-year-old Nano Miller was born and bred on Dog Island where life has been mostly wonderful except for annual heartbreak when another robot dog is torn from her arms and replaced with the latest model.

Roebee: The Robot Dog Cassandra Pletcher, Rory Pletcher, 2018-06-12 Roebee finds himself trapped as he watches the world go by in front of him. He does what he never thought he could do to become what he never thought he could be.

The Robot Dog Tom Darmanin, 2017-06-11 It was in the year 2200 and Tom had lost his dog Helina who had died of old age. But he did not want to believe it and he would not. Fortunately, he heard about the robot dog company that has recently made robots with the appearance of real dogs. But of course, for the robot to have the appearance of his dog, it was necessary to contact the company so that it manufactures a robot from the photos of Helina. You had to be very patient and pay the company in advance, whereas it took a year. One day a carrier arrived in front of Tom's house with a big box from the robot dog company. He suspected that there had to be inside. No need to feed him, no need to get him out because it was not a real dog. On the other hand, it had to be sent back to the company once a year for a diagnosis. Finally, a dog that is immortal at least. In addition, the company has added to him the word since this is what is lacking in principle to the dogs. So we can know everything about this new dog which is like a child.

into their expressions and actions it is easy to suppose that they have minds like ours And as technology grows more sophisticated we might soon find ourselves interpreting the behaviour of robots too in human terms It is natural for us to humanize other beings in this way but is it philosophically or scientifically justifiable How different might the minds of animals or machines be to ours As David McFarland asks here could robots ever feel guilty and is it correct to suppose your dog can truly be happy Can we ever know what non human minds might be like or will the answer be forever out of our reach These are central and important questions in the philosophy of mind and this book is an accessible exploration of the differing philosophical positions that can be taken on the issue McFarland looks not only at philosophy but also examines new evidence from the science of animal behaviour plus the latest developments in robotics and artificial intelligence to show how many different and sometimes surprising conclusions we can draw about the nature of alien minds

Horror Dogs Brian Patrick Duggan, 2023-08-07 How did beloved movie dogs become man killers like Cujo and his cinematic pack mates For the first time here is the fascinating history of canines in horror movies and why our best friends were and are still painted as malevolent Stretching back into Classical mythology treacherous hounds are found only sporadically in art and literature until the appearance of cinema's first horror dog Sherlock Holmes Hound of the Baskervilles The story intensifies through World War II's K 9 Corps to the 1970s animal horror films which broke social taboos about the good dog on screen and deliberately vilified certain breeds sometimes even fluffy lapdogs With behind the scenes insights from writers directors actors and dog trainers here are the flickering hounds of silent films through talkies and Technicolor to the latest computer generated brutes the supernatural rabid laboratory made alien feral and trained killers Cave Canem Beware the Dog or as one seminal film warned They're not pets anymore

The Internet of Animals Deborah Lupton, 2023-03-07 The internet is made of cats is a half jokingly made claim Today animals of all shapes and sizes inhabit our digital spaces including companion animals wildlife feral animals and livestock In this book Deborah Lupton explores how digital technologies and datafication are changing our relationships with other animals Playfully building on the concept of The Internet of Things she discusses the complex feelings that have developed between people and animals through the use of digital devices from social media to employing animal like robots as companions and carers The book brings together a range of perspectives including those of sociology cultural geography environmental humanities critical animal studies and internet studies to consider how these new digital technologies are contributing to major changes in human animal relationships at both the micropolitical and macropolitical levels As Lupton shows while digital devices and media have strengthened people's relationships to other creatures these technologies can also objectify animals as things for human entertainment therapy or economic exploitation This original and engaging book will be of interest to scholars and students across the social sciences and humanities

Humans and Robots Sven Nyholm, 2020-03-09 Can robots perform actions make decisions collaborate with humans be our friends perhaps fall in love or potentially harm us Even before these things truly happen ethical and

philosophical questions already arise The reason is that we humans have a tendency to spontaneously attribute minds and agency to anything even remotely humanlike Moreover some people already say that robots should be our companions and have rights Others say that robots should be slaves This book tackles emerging ethical issues about human beings robots and agency head on It explores the ethics of creating robots that are or appear to be decision making agents From military robots to self driving cars to care robots or even sex robots equipped with artificial intelligence how should we interpret the apparent agency of such robots This book argues that we need to explore how human beings can best coordinate and collaborate with robots in responsible ways It investigates ethically important differences between human agency and robot agency to work towards an ethics of responsible human robot interaction

Companion Robots for Older Adults Sofia Thunberg, 2024-05-06 This thesis explores through a mixed methods approach what happens when companion robots are deployed in care homes for older adults by looking at different perspectives from key stakeholders. Nine studies are presented with decision makers in municipalities, care staff and older adults as participants and the studies have primarily been carried out in the field in care homes and activity centres where both qualitative e.g. observations and workshops and quantitative data surveys have been collected. The thesis shows that companion robots seem to be here to stay and that they can contribute to a higher quality of life for some older adults. It further presents some challenges with a certain discrepancy between what decision makers want and what staff might be able to facilitate. For future research and use of companion robots it is key to evaluate each robot model and potential use case separately and develop clear routines for how they should be used and most importantly let all stakeholders be part of the process. The knowledge contribution is the holistic view of how different actors affect each other when emerging robot technology is introduced in a care environment.

Den här avhandlingen utforskar vad som händer när sällskapsrobotar införs på omsorgsboenden för äldre genom att titta på perspektiv från olika intressenter. Nio studier presenteras med kommunala beslutsfattare, vårdpersonal och äldre som deltagare. Studierna har i huvudsak genomförts i fält på särskilda boenden och aktivitetscenter där både kvalitativa exempelvis observationer och workshops och kvantitativa data enkäter har samlats in. Avhandlingen visar att sällskapsrobotar verkar vara här för att stanna och att de kan bidra till en högre livskvalitet för vissa äldre. Den visar även på en del utmaningar med en viss diskrepans mellan vad beslutsfattare vill införa och vad personalen har m

jlighet att utföra i sitt arbete. För framtida forskning och användning av sllskapsrobotar är det viktigt att utvärdera varje robotmodell och varje användningsområde var för sig och ta fram tydliga rutiner för hur de ska användas och viktigast av allt låta alla intressenter vara en del av processen. Kunskapsbidraget med avhandlingen är en helhetssyn på hur olika aktörer påverkar varandra när ny robotteknik introduceras i en förskolemiljö.

Fuzzy Systems and Data Mining IX Antonio J. Tallón-Ballesteros, Raquel Beltrán-Barba, 2023-12-15 Fuzzy systems and data mining are indispensable aspects of the digital technology on which we now all depend. Fuzzy logic is intrinsic to applications in the electrical, chemical and engineering industries and also in the fields of management and environmental issues. Data mining is indispensable in dealing with big data, massive data and scalable, parallel and distributed algorithms. This book presents the proceedings of FSDM 2023, the 9th International Conference on Fuzzy Systems and Data Mining, held from 10-13 November 2023 as a hybrid event with some participants attending in Chongqing, China and others online. The conference focuses on four main areas: fuzzy theory, algorithms and systems, fuzzy application, data mining and the interdisciplinary field of fuzzy logic and data mining and provides a forum for experts, researchers, academics and representatives from industry to share the latest advances in the field of fuzzy sets and data mining. This year, topics from two special sessions on granular ball computing and the application of generative AI, as well as machine learning and neural networks, were also covered. A total of 363 submissions were received and after careful review by the members of the international program committee, 110 papers were accepted for presentation at the conference and publication, here representing an acceptance rate of just over 30%. Covering a comprehensive range of current research and developments in fuzzy logic and data mining, the book will be of interest to all those working in the field of data science.
