Live from the Underground Katherine Rye Jewell,2023-12-05 Bands like R E M U2 Public Enemy and Nirvana found success as darlings of college radio but the extraordinary influence of these stations and their DJs on musical culture since the 1970s was anything but inevitable As media deregulation and political conflict over obscenity and censorship transformed the business and politics of culture students and community DJs turned to college radio to defy the mainstream and they ended up disrupting popular music and commercial radio in the process In this first history of US college radio Katherine Rye Jewell reveals that these eclectic stations in major cities and college towns across the United States owed their collective cultural power to the politics of higher education as much as they did to upstart bohemian music scenes coast to coast Jewell uncovers how battles to control college radio were about more than music they were an influential if unexpected front in the nation s culture wars These battles created unintended consequences and overlooked contributions to popular culture that students DJs and listeners never anticipated More than an ode to beloved stations this book will resonate with both music fans and observers of the politics of culture

The Rise and Fall of Television Journalism Steven Barnett,2011-11-08 This book traces the history of television journalism in Britain from its austere roots in the BBC s post war monopoly to the present day plethora of

24 hour channels and celebrity presenters It asks why a medium whose thirst for pictures personalities and drama makes it some believe intrinsically unsuitable for serious journalism should remain in the internet age the most influential purveyor of news Barnett compares the two very different trajectories of television journalism in Britain and the US arguing that from the outset a rigorous statutory and regulatory framework rooted in a belief about the democratic value of the medium created and sustained a culture of serious responsible accurate and interrogative journalism in British television The book s overarching thesis is that despite a very different set of historical regulatory and institutional practices there is a very real danger that Britain is now heading down the same road as America

Liveness in Modern Music Paul Sanden,2013-01-17 This study investigates the idea and practice of liveness in modern music Understanding what makes music live in an ever changing musical and technological terrain is one of the more complex and timely challenges facing scholars of current music where liveness is typically understood to represent performance and to stand in opposition to recording amplification and other methods of electronically mediating music The book argues that liveness itself emerges from dynamic tensions inherent in mediated musical contexts tensions between music as an acoustic human utterance and musical sound as something produced or altered by machines Sanden analyzes liveness in mediatized music music for which electronic mediation plays an intrinsically defining role exploring the role this concept plays in defining musical meaning In discussions of music from both popular and classical traditions Sanden demonstrates how liveness is performed by acts of human expression in productive tension with the electronic machines involved in making this music whether on stage or on recording Liveness is not a fixed ontological state that exists in the absence of electronic mediation but rather a dynamically performed assertion of human presence within a technological network of communication This book provides new insights into how the ideas of performance and liveness continue to permeate the perception and reception of even highly mediatized music within a society so deeply invested on every level with the use of electronic technologies
