Rocket Dreams Marina Benjamin, 2003-05-25 In 1958 mankind's centuries long flirtation with space flight became a torrid love affair For a decade tens of millions of people were enraptured first by the U S Soviet race to the moon and finally as America outstripped its rival by Project Apollo alone It is now more than three decades since the last man walked on the moon more time than between the first moonwalk and the beginning of World War II Apollo did not as had been promised by a generation of visionaries herald the beginning of the Space Age but its end Or did it Project Apollo like a cannonball reached its apogee and returned to earth but the trajectory of that return was complex America's atmosphere its economic scientific and cultural atmosphere made for a very complicated reentry that produced many solutions to the trajectory problem *Rocket Dreams* is about those solutions about the places where the space program landed In *Rocket Dreams* an extraordinarily talented young writer named Marina Benjamin will take you on a journey to those landing sites A visit with retired astronauts at a celebrity autograph show is a starting point down the divergent paths taken by the pioneers including Edgar Mitchell founder of the church of No tic Sciences Roswell New Mexico is a landing site of a different order the magnetic north of UFO belief in the United States a belief that began its most dramatic growth precisely at the time that the path of the space program began its descent In the vernacular the third law of motion states that what goes up must come down Thus the tremendous motive force that energized the space program didn't just vanish it was conserved and transformed making bestsellers out of fantasy literature spawning Gaia and giving symbolism to the environmental movement Everything from the pop cultural boom in ufology to the worldwide Search for

Extra Terrestrial Intelligence SETI feeds on the energy given off by America's leap toward space. Rocket Dreams is an eloquent tour of this Apollo-scarred landscape. It is also an introduction to some of the most fascinating characters imaginable. Some long dead like the crackpot visionary Alfred Lawson who saw in space flight a new stage of human evolution. Alti Man or Robert Goddard the father of rocketry whose workshop in Roswell stands only half a mile from shops selling posters of alien visitors. Others are very much alive like Stewart Brand creator of the Whole Earth Catalog and partner with Gerard O'Neill in the drive to build free floating space colonies and SETI astronomer Seth Shostak who has spent decades listening to the skies hoping for the first contact with another intelligent species. Perceptive, original and wonderfully written, informed by history, science and an acute knowledge of popular culture, Rocket Dreams is a brilliant book by a remarkable talent.

Kosmos: A Portrait of the Russian Space Age, 2001-11. The inherent contradictions of the Space Age, the mixture of technologies high and low, of nostalgia and progress, of pathos and promise are revealed in Kosmos. Adam Bartos's astonishing photographic survey of the Soviet space program. Bartos's fascination with this subject led him to seek out places like the bedroom where Yuri Gagarin slept the night before his history-making flight into space, located in the Baikonur Cosmodrome, the one-time top secret space complex in the Kazakh desert. Kosmos presents 94 of Bartos's photographs rich with the incongruities of the history, science, culture and politics of the Space Age. Century of the Child, Juliet Kinchin, Aidan O'Connor, 2012. The book examines individual and collective visions for the material world of children from utopian dreams for the citizens of the future to the dark realities of political conflict and exploitation. Surveying more than 100 years of toys, clothing, playgrounds, schools, children's hospitals, nurseries, furniture, posters, animation and books, this richly illustrated catalogue illuminates how progressive design has enhanced the physical, intellectual and emotional development of children and conversely how models of children's play have informed experimental aesthetics and imaginative design thinking. *Occupational Outlook Quarterly*, 1959.
