## **Rodin The World Of Art:**

Rodin Bernard Champigneulle, 1967 Auguste Rodin the greatest sculptor of the nineteenth century was also probably the greatest since Michelangelo whose genius was a lifelong inspiration to him Though the astonishing lifelike quality of his sculpture first apparent in Bronze Age 1877 was in total defiance of current academic conventions Rodin did not have to face the prolonged and bitter hostility meted out to the Impressionist painters who were his contemporaries and in later life he became a famous and widely respected figure In this important new monograph Bernard Champigneulle analyses Rodin s great significance as an innovator in sculpture For Rodin created an entirely new form the detail considered as a finished work and in doing so exercised a lasting influence on his successors who were affected equally profoundly by his emotional expressiveness his power of characterization and the subtlety of his modelling M Champigneulle combines a searching reappraisal of Rodin s achievement with a revealing account of his personality and of his troubled personal life **Art**

**Modernity, History, and Politics in Czech Art** Marta Filipová, 2019-07-08 This book traces the influence of the changing political environment on Czech art criticism history and theory between 1895 and 1939 looking beyond the avant garde to the peripheries of modern art The period is marked by radical political changes the formation of national and regional identities and the rise of modernism in Central Europe specifically the collapse of Austria Hungary and the creation of the new democratic state of Czechoslovakia Marta Filipová studies the way in which narratives of modern art were formed in a constant negotiation and dialogue between an effort to be international and a desire to remain authentically local

Translation and the Arts in Modern France Sonya Stephens, 2017-07-10 Translation and the Arts in Modern France sits at the intersection of transposition translation and ekphrasis finding resonances in these areas across periods places and forms Within these contributions questions of colonization subjugation migration and exile connect Benin to Brittany and political philosophy to the sentimental novel and to film Focusing on cultural production from 1830 to the present and privileging French culture the contributors explore interactions with other cultures countries and continents often explicitly equating intercultural permeability with representational exchange In doing so the book exposes the extent to which moving between media and codes the very process of translation and transposition is a defining aspect of creativity across time space and disciplines

**Art History as Social Praxis** David Craven, 2017-08-21 **Art History as Social Praxis** The Collected Writings of David Craven brings together more than thirty essays that chart the development of Craven's voice as an unorthodox Marxist who applied historical materialism to the study of modern art This book demonstrates the range and versatility of David Craven's praxis as a democratic socialist art historian who assessed the essential role the visual arts play in imagining more just and equitable societies The essays collected here reveal Craven's lifelong commitment to exposing interstices between western and non-western cultures by researching the reciprocating influences between First and Third World artists critics and historians
