International Education in Practice Mary Hayden,Jeff Thompson,George Walker,2003-12-16 Edited by three leading figures in the field this book offers an absolutely authoritative interpretation of international education today Under the umbrella of groups such as the International Baccalaureate Organization academic research increasing student numbers and interest from national school systems international schools are rapidly developing in terms of curriculum standards and influence This book brings together present thinking on all aspects of international education its management and the best practices Truly international in scope this is a book that anyone involved with international education should read *Pragmaticizing Understanding* Michael Meeuwis,Jan-Ola Östman,2012-05-01 The ideas that mark modern day pragmatics are old but did not start to get more systematically developed until the 1960s and 1970s Still the very recognition of pragmatics as a self standing academic discipline is a product of the 1980s not least made possible by the establishment of the International Pragmatics Association One scholar in particular has devoted his life both to IPrA and to the discipline This volume pays homage to Jef Verschueren on the occasion of his 60th birthday It celebrates him for his long standing dedication as Secretary General of IPrA and for his scholarly contributions to the field We owe to Jef Verschueren the insight that the processes through which language users do or do not achieve understanding among each other in communication can only be fully comprehended if approached from a pragmatic perspective i e if understanding is
