1850 **Rogues and Vagabonds** Lionel Rose, **The SAGE Handbook of Historical Geography** Mona Domosh, Michael Heffernan, Charles W. J. Withers, 2020-11-25 Historical geography is an active theoretically informed and vibrant field of scholarly work within modern geography with strong and constantly evolving connections with disciplines across the humanities and social sciences Across two volumes The SAGE Handbook of Historical Geography provides you with an international and cross disciplinary overview of the field presenting chapters that examine the history present condition and future potential of the discipline in relation to recent developments and research **The New Police in the Nineteenth Century** Paul Lawrence, 2017-07-05 The period 1829 1856 witnessed the introduction of the New Police to Great Britain and Ireland Via a series of key legislative acts traditional mechanisms of policing were abolished and new supposedly more efficient forces were raised in their stead Subsequently the introduction of the New Police has been represented as a watershed in the development of the systems of policing we know today But just how sweeping were the changes made to the maintenance of law and order during the nineteenth century The articles collected in this volume written by some of the foremost criminal justice historians show a process which while cumulatively dramatic was also at times protracted and acrimonious There were significant changes to the way in which Britain and Ireland were policed during the nineteenth century but these changes were by no means as straightforward or as progressive as they have at times been represented

reveal how religion and superstition ebbed and flowed together *Law, Insecurity and Risk Control* John Pratt, 2020-08-05

This book examines our contemporary preoccupation with risk and how criminal law and punishment have been transformed as a result of these anxieties. It adopts an historical approach to examine the development of risk control measures used across the US, UK, New Zealand, Australia and Canada particularly since the 1980s with the rise of the security sanction. It also takes a criminological and sociological approach to analysing shifts in criminal law and punishment and its implications for contemporary society and criminal justice systems. *Law, Insecurity and Risk Control* analyses the range and scope of the security sanction and its immobilizing measures ranging from control over minor incivilities to the most serious crimes. Despite these innovations though it argues that our anxieties about risk have become so extensive that the security sanction is no longer sufficient to provide social stability and cohesion. As a consequence people have been attracted to the magic of populism in a revolt against mainstream politics and organisations of government as with the EU referendum in the UK and the US presidential election of Donald Trump in 2016. While there have been political manoeuvrings to rein back risk and place new controls on it these have only brought further disillusionment, insecurity and anxiety. This book argues that the security sanction is likely to become more deeply embedded in the criminal justice systems of these societies as new risks to both the well being of individuals and the nation state are identified.

The European City and Green Space Peter Clark, 2016-12-05

Recent years have seen sustained public debate and controversy over the greening of European cities associated with the environmental movement, pressures of urban redevelopment and the promotional strategies of cities competing in a global market. But the European debate over urban green space has a long history dating back to Victorian concerns for the green lungs of the city to combat the health and social problems caused by rapid population and industrial growth. This book explores the multiplicity of green space developments in the modern city ranging over parks and commons, garden suburbs and the cities in the park, allotment gardens, green belts and national urban parks. It is concerned not only with the different types of green space but the many influences shaping their evolution from international planning ideas to the rise of modern day sport and leisure and the effects of the transport revolution. No less vital in this story is the interaction of the many actors involved in the often fractious political process of creating green spaces: architects and planners, politicians, developers and other businessmen, NGOs and local residents. This volume is particularly concerned with contexts: how international planning ideas are transmitted and adapted in different European cities; how the construction of green space is affected by local power structures and relationships; and how ordinary people perceive and use green spaces quite often at variance with official designs. *The European City and Green Space* looks at these and other issues through the prism of four metropolises: London, Stockholm, Helsinki and St Petersburg. All represent different types of North European city yet each has experienced distinctive economic, political and cultural trajectories whilst also facing powerful challenges and problems of similar kinds with regard to green space. This volume examines how each has responded to them and what
