Porter, Sean A. Adams, 2016-11-03 This two volume set is part of a growing body of literature concerned with the history of biblical interpretation The ample introduction first situates key players in the story of the development of the major strands of biblical interpretation since the Enlightenment identifying how different theoretical and methodological approaches are related to each other and describing the academic environment in which they emerged and developed Volume 1 contains fourteen essays on twenty two interpreters who were principally active before 1980 and volume 2 has nineteen essays on twenty seven of those who were active primarily after this date Each chapter provides a brief biography of one or more scholars as well as a detailed description of their major contributions to the field This is followed by an often new application of the scholar s theory By focusing on the individual scholars and their work the book recognizes that interpretive approaches arise out of certain circumstances and that scholars are influenced by and have influences upon both other interpreters and the times in which they live This set is ideal for any class on the history of biblical interpretation and for those who want a greater understanding of how the current field of biblical studies developed The Long Presidency Julius W Friend, 2018-02-07 A balanced yet critical review of Mitterrand s fourteen year presidency Friend has crowned a long career as an expert on French politics with this astute analysis and assessment of a decisive chapter in the history of French Socialism This is contemporary history at its best Richard Kuisel SUNY Stony Brook An intelligent and highly readable account of the Mitterrand years that Friend argues have changed the political landscape of France A very good example of

instant history Fritz Stern Foreign Affairs In this informed and balanced treatment of recent French history Julius Friend analyzes the changes successes and failures in the long and checkered record of the former French president Francois Mitterrand Extensive interviews with French politicians and intellectuals complement his original research Mitterrand was in office longer than any other democratic president but Friend asks us to consider the legacy of such a term Elected in 1981 on a platform of radical reorganization of the French economy and society Mitterrand was compelled to change policy within two years Conventional austerity replaced socialist measures and his second term was spotted by scandal and weakened by illness The Mitterrand era saw the end of French hopes to be first among equals in Western Europe instead Mitterrand

(1250-1350) P?r Bokody, 2017-07-05 The rebirth of realistic representation in Italy around 1300 led to the materialization of a pictorial language which dominated Western art until 1900 and it dominates global visual culture even today Paralleling the development of mimesis self reflexive pictorial tendencies emerged as well Images within images visual commentaries of representations by representations were essential to this trend They facilitated the development of a critical pictorial attitude towards representation This book offers the first comprehensive study of Italian meta painting in the age of Giotto and sheds new light on the early modern and modern history of the phenomenon By combining visual hermeneutics and iconography it traces reflexivity in Italian mural and panel painting at the dawn of the Renaissance and presents novel interpretations of several key works of Giotto di Bondone and the Lorenzetti brothers The potential influence of the contemporary religious and social context on the program design is also examined situating the visual innovations within a broader historical horizon The analysis of pictorial illusionism and reality effect together with the liturgical narrative and typological role of images within images makes this work a pioneering contribution to visual studies and premodern Italian culture **Political Theory of**

Global Justice Luis Cabrera, 2006-02-03 This book offers a moral argument for world government claiming that not only do we have strong obligations to people elsewhere but that accountable integration among nation states will help ensure all persons can lead a decent life [Recasting Welfare Capitalism](#) Mark Vail, In Recasting Welfare Capitalism Mark Vail

employs a sophisticated and original theoretical approach to compare welfare states and political economic adjustment in Germany and France He examines how and why institutional change takes place and what factors characterize economic evolution when moving from times of prosperity to more austere periods and back again Covering the 1970s to the present Vail analyzes social and economic reforms including labor policy social insurance and anti poverty programs He focuses on the tactics and actions of key political players and demolishes the stagnation argument that suggests that France and Germany have largely frozen political economies incapable of reform Vail finds that these respective evolutions involve

interrelated changes in social and economic policies and are characterized by political relationships that are continuously renegotiated often in unpredictable ways In the process he presents a compelling reconceptualization of change in both the welfare state and the broader political economy during an age of globalization *The Video Directory*,1987 **Martin Luther** Dyron Daughtrity,2017-09-12 Martin Luther is a fresh retelling of one the most significant figures of the last millennium Not written primarily for theologians but rather for a general audience Martin Luther traces Luther s early development his conflicts with civic and religious authorities his leadership of reform in Germany and the subsequent impact of Luther s writings and beliefs as they stretched around the world **Vocational and Professional Capability** Gerard Lum,2011-11-03 The central claim of this fascinating monograph is that strategies for vocational and professional education adopted by the UK over the last two decades are founded upon a number of fundamental and fatal errors The essential problem is that these strategies derive from a number of philosophical confusions about what it is to be skilled competent or capable The aim of the book is to unravel the philosophical assumptions at the heart of current strategies examine their shortcomings and propose a more coherent account of vocational and professional capability It will be argued that not only does this have serious practical implications for the vocational curriculum teaching learning and assessment but that it indicates the need for an urgent and radical reassessment of the relationship between vocational general and academic education Miles Wallingford James Fenimore Cooper,1889 Uniquely Human: The Basis of Human Rights Gabriel Moran,2013 The basis of human rights remains in need of exploration The effectiveness of the language of human rights is threatened by its widespread but uncritical use This book is neither a sermon to believers nor an attack by a skeptic It is a critical look at the basis of those few rights that are genuinely universal for example a right not to be tortured or a right to basic subsistence A human right is a claim that every human being can make on the whole human race The rights that are specifically human arise from a human respect for all living beings There is still a widespread assumption that human rights is just another name for the confused idea of natural rights from the eighteenth century rights that were promulgated by and for adult white males The authors of the UN s Universal Declaration of Human Rights in 1948 assumed that they were reformulating an old idea Instead they were beginning a new idea Human rights can be realized only through conversations across differences within gender age culture and religion This book traces those continuing conversations that fill out the diversity within the unity of the human race The convergence of many particular traditions creates a human tradition that can sustain human rights as a standard of moral conduct for all nations *Values and Music Education* Estelle R. Jorgensen,2021-11-09 What values should form the foundation of music education And once we decide on those values how do we ensure we are acting on them In *Values and Music Education* esteemed author Estelle R Jorgensen explores how values apply to the practice of music education We may declare values but they can be hard to see in action Jorgensen examines nine quartets of related values and offers readers a roadmap for thinking constructively and critically about the

values they hold In doing so she takes a broad view of both music and education while drawing on a wide sweep of multidisciplinary literature Not only does Jorgensen demonstrate an analytical and dialectical philosophical approach to examining values but she also seeks to show how theoretical and practical issues are interconnected An important addition to the field of music education Values and Music Education highlights values that have been forgotten or marginalized underscores those that seem perennial and illustrates how values can be double edged swords **Stringed Instruments of**

Ancient Greece Martha Maas,Jane McIntosh Snyder,1989-01-01 No ancient culture has left us more tantalizing glimpses of its music than that of the Greeks whose art and literature continually speak to us of the role of music its power and its significance to their society In this book two scholars one of music and one of classics join together to explore the musical life of ancient Greece focusing on the Greek stringed instruments and in particular on the all important lyre family Book jacket

Non-Western Educational Traditions Timothy G. Reagan,2004-09-22 This text provides a brief yet comprehensive overview of a number of non Western approaches to educational thought and practice Its premise is that understanding the ways that other people educate their children as well as what counts for them as education may help us think more clearly about some of our own assumptions and values and to become more open to alternative viewpoints about important educational matters The value of this informative mind opening text for preservice and in service teacher education courses is enhanced by Questions for Discussion and Reflection and Recommended Further Readings included in each chapter New in the Third Edition Chapter 2 Conceptualizing Culture I We and The Other is new to this edition It is a response to feedback about the problems inherent in our general discourse about culture and in addition provides an example of a culture that is near to us but nevertheless alien the culture of the Deaf World Chapter 9 which deals with Islam and traditional Muslim education has been substantially revised The subtitle of the Third Edition has been changed to Indigenous Approaches to Educational Thought and Practice reflecting not so much a change in the emphases found in the book but rather a recognition of the growing scholarly interest in indigenous peoples their languages cultures and histories Various points throughout the text have been expanded and clarified and chapters have been updated as needed *The Everyday World as Problematic* Dorothy E. Smith,1987-01-01 The six essays in this volume chart the development of Dorothy Smith s approach to the study of social life She examines the struture of the everyday world through the lenses of feminist theory Marxism and phenomenology Smith s analysis derives from the premise that women are excluded from what she calls the ruling apparatus of culture Culture she argues does not arise spontaneously but rather is manufactured by those in positions of dominance almost exclusively men who originate the forms of though we use to consider ourselves and society The perspectives concerns interests of only one sex and one class are represented as general Only one sex and class are actively involved in producing debating developing its ideas its art its medical and psychological conceptions its educational values and objectives From this perspective Smith proposes an alternative to traditional socological inquiry a sociology beginning from

women's actual lived experience and explores methods of thinking which will realize the project of a sociology for women. She goes on to work through a conception of the experienced world as problematic to a research strategy and sketches out a possible research project which employs her method of institutional ethnography. Finally, she proposes a remaking of the relations of social not exclusively sociological knowledge, creating forms of knowledge which substitute relations among subjects by the objectified forms through which we know others as objects.
