Roland Terry Master Northwest Architect:

Roland Terry Justin Henderson, Roland Terry, 2000 Every great architect offers an original vision one that synthesizes and then transcends all that he or she has learned Roland Terry's career follows that archetypal mode yet Terry occupies a unique place in the Northwest architectural tradition The elements that define his originality are subtle a fusion of classic Northwest Modernist traditions leavened with a warm yet cosmopolitan sophistication one that grew organically out of his education his background in the thriving Seattle art and architecture communities of the 1930s 1940s and 1950s and his experiences while traveling and living abroad Poised between modern functionalism and rich traditionalism Roland Terry's work embraces the best of old and new His body of residential work in Seattle and elsewhere illuminates the subtle depth power and completeness of his design talents He had a matchless skill at integrating his ideas with the needs of his clients particularly with regard to interior design As is evident in the book these are houses made for the ages Renowned glass artist Dale Chihuly wrote of Terry's work whenever I've visited a Roland Terry house it's been like visiting Matisse's chapel or Renoir's studio one of those special days that you remember forever This is not to suggest that Terry's commercial work pales in comparison On the contrary from the earliest incarnations of Seattle's Canlis Restaurant in the late 1940s through the myriad restaurants shops hotels and offices designed in the 1950s 1960s and 1970s Terry created a striking and original body of institutional buildings and interiors including the original Nordstrom flagship store in downtown Seattle the Half Moon Hotel in Montego Bay Jamaica the Kahala Hilton now Mandarin Oriental Hotel in Honolulu A number of these groundbreaking commercial projects are included here to illustrate the remarkable diversity of architectural and decorative approaches that Terry and his partners and associates employed in creating comfortable user friendly public buildings As is true with his residences Terry never chased fads or trends in his commercial designs Instead he sought the timeless essential and complete response to the given design problem and he did so with subtlety and style During Roland Terry's long and eventful career spanning more than half a century it was his ability to see the whole picture to envision a complete design embracing site building and interiors that remains unique to this day in the Northwest Couple that singular talent with a rigorous attention to detail and a remarkable ability to integrate art into architecture and you have an American original of the Northwest genre

Shaping Seattle Architecture Jeffrey Karl Ochsner, 2016-06-01 The first edition of Shaping Seattle Architecture published in 1994 introduced readers to Seattle's architects by showcasing the work of those who were instrumental in creating the region's built environment Twenty years later the second edition updates and expands the original with new information and illustrations that provide an even richer exploration of Seattle architecture The book begins with a revised introduction that brings the story of Seattle architecture into the twenty first century and situates developments in Seattle building design within local and global contexts The book's fifty four essays present richly illustrated profiles that describe the architects careers provide an overview of their major works and explore their significance Shaping

Seattle Architecture celebrates a wide range of people who helped form the region's built environment. It provides updated information about many of the architects and firms profiled in the first edition. Four individuals newly included in this second edition are Edwin J. Ivey, a leading residential designer; Fred Bassetti, an important contributor to Northwest regional modernism; L. Jane Hastings, one of the region's foremost women in architecture; and Richard Haag, founder of the landscape architecture program at the University of Washington and designer of Gas Works Park and the Bloedel Reserve. The book also includes essays on the buildings of the Coast Salish people who inhabited Puget Sound prior to Euro-American settlement; the role that architects played in speculative housing developments before and after World War II; and the vernacular architecture built by nonprofessionals that makes up a portion of the fabric of the city. *Shaping Seattle Architecture* concludes with a substantial reference section updated to reflect the last twenty years of research and publications. A locations appendix offers a geographic guide to surviving works. The research section directs interested readers to further resources, and the appendix *Additional Significant Seattle Architects* provides thumbnail sketches of nearly 250 important figures not included in the main text.
