UNU Publications United Nations University,1994 **Japanese Economic Development** Penny Francks,2015-05-19

This fully revised and updated third edition of Japanese Economic Development looks at Japan s economic history from the nineteenth century through to World War II recasting analysis of Japan s economic past in the light fresh theoretical perspectives in the study of economic history and development Francks draws out the historical roots of the institutions and practices on which Japan s post war economic miracle was based and provides a comparative framework within which the Japanese case can be understood and related to development in the rest of the world New features for this edition include textboxes summarising key concepts expanded coverage of the early modern economy the traditional sector and the international context of Japanese growth an increased number of case studies fully up dated references glossary and bibliography Taking a thematic approach this textbook demonstrates how studying the first example of Asian industrialisation can provide the basis for an alternative non western narrative of development As it such is an important resource for undergraduate and postgraduate courses on the Japanese economy as well as comparative economic development and economic history more generally *Labour-Intensive Industrialization in Global History* Gareth Austin,Kaoru

Sugihara,2013-09-13 The prevailing view of industrialization has focussed on technology capital entrepreneurship and the institutions that enabled them to be deployed Labour was often equated with other factors of production and assigned a relatively passive role Yet it was labour absorption and the improvement of the quality of labour over the course of several centuries that underscored the timing pace and quality of global industrialization While science and technology developed in the West and whereas the use of fossil fuels especially coal and oil were vital to this process the more recent history has been underpinned by the development of comparatively resource and energy saving technology without which the diffusion of industrialization would not have been possible The labour intensive resource saving path which emerged in East Asia under the influence of Western technology and institutions and is diffusing across the world suggests the most realistic route humans could take for a further diffusion of industrialization which might respond to the rising expectations of living standards without catastrophic environmental degradation Long-term Planning for National Science Policy United States. Development of Environmental Policy in Japan and Asian Countries T. Terao,K. Work, Mobility, and Participation Robert E. Cole, 2024-06-28 At a minimum our goal is to develop a better understanding of Japanese labor market practices and work organization and in so doing develop a more enlightened vision

of American practices We will greatly enhance our ability to achieve both these goals by arriving at a better understanding of the comparative experience of the two nations over time We can no longer afford the delusion that what exists in the United States reflects the characteristics of industrial society in its most advanced form Yet to follow current fashion in simply denying that the United States is the very model of a modern society while advocating that we imitate the Japanese is to take a course filled with its own pitfalls Perhaps it is time we accepted the fact that the social scientist's intense commitment to generalization cannot be allowed to obscure the fundamental observation that nations develop along their own paths based on their own political cultural economic and social histories As nations industrialize there is undoubtedly convergence in important institutional spheres such as the expansion of education the adoption of common technologies and determinants of labor mobility Certainly nations can learn from one another and indeed some nations impose their will on other nations Yet there are also unique solutions to common problems From the Introduction This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1979 Work, Mobility, and Participation Bob Cole, Robert E. Cole, Professor of Business Administration and Sociology Lorraine Tyson Mitchell II Professor of Leadership and Communication Robert E Cole, 1979-01-01 Comparison of work attitudes labour mobility and workers participation as related to the overall quality of working life in Japan and the USA traces the incorporation of employment security into Japan's value system and trends in organization behaviour includes case studies of occupational change of men industrial workers and innovations in personnel management quality circles job design finds convergence of work organization patterns Bibliography graphs illustrations statistical tables **Housework, Consumption and Female Labour in Japan, 1600–1940** Penelope Francks, 2025-02-27 This book illuminates the largely neglected contribution of unpaid primarily female household labour to economic production and living standards in Japan from the early modern period to the eve of World War Two The difficulties involved in measuring time devoted to housework and other forms of household labour in the past have meant that most attempts to assess the process of industrialisation have failed to recognise the ways in which such labour is essential to the sustainability and welfare of the population In this context Japan presents a significant example of a historical case of industrialisation occurring within an economy that continued to be dominated by the institution of the household This short study argues that this must have led to a particularly significant underestimation of Japanese living standards in the past with implications for comparative and global analysis and to neglect of the key role of women in the historical economy Providing a nuanced yet concise analysis this book will be valuable reading for scholars of economic history and feminist economics as well as introducing important comparative angles for researchers in Japanese studies and gender studies more widely **History of Innovative Entrepreneurs in**

Japan Takeo Kikkawa, 2023-03-18 This is the first Open Access book introducing more than 20 of Japan's leading innovative entrepreneurs from the 17th century to the present. The author outlines the innovative business models created by entrepreneurs including SoftBank's Masayoshi Son, Fast Retailing Uniqlo's Yanai Tadashi, Honda's Soichiro Honda, Sony's Akio Morita, Panasonic's Konosuke Matsushita, and Toyota's Kiichiro Toyoda, as well as their predecessors including Takatoshi Mitsui of Mitsui Zaibatsu, Shibusawa Eiichi of Daiichi Bank. While introducing the innovators, the author also raises three broader questions: 1. Why did Japan industrialize earlier than any other country outside Europe and the United States? 2. Why was Japan able to realize unsurpassed economic growth between the 1910s and the 1980s? 3. Why has Japan's economy stagnated for more than 30 years since the 1990s? Drawing upon analytical concepts including Schumpeter's breakthrough innovation, Kirzner's incremental innovation, and Christensen's disruptive innovation, the author contends that Japan's successes were based on unique and systematic breakthrough innovation and an accumulation of incremental innovation, while it later fell victim to a combination of breakthrough innovation from advanced countries and disruptive innovation by developing nations. *United Nations Publications*, 2000 **THE NEW ECONOMIC NATIONALISM** Monica de Bolle, Jérémie Cohen-Setton, Madi Sarsenbayev, 2025-04-15 Empires, city states, and nations have long pursued aggressive trade, tax, and investment policies to amass wealth. A new consensus emerged after the Great Depression and World War II, supporting liberalized international trade, economic cooperation, and free markets. Today, that consensus has shattered, replaced by a new economic nationalism of industrial policy, tariffs, and various methods of state support for the economy. Can this new approach deliver stability, national security, and prosperity? This book examines case studies revealing a decidedly mixed record. In some instances, economic nationalist policies have fostered growth and declining unemployment, though accompanied by fiscal costs and inefficiency. In much of the developing world, however, economic nationalist policies have produced corruption, debt burdens, inflation, and ultimately stagnation. By examining the past, *The New Economic Nationalism* provides a roadmap to an uncertain future. **Averting a Great Divergence** Peer Vries, 2019-08-08 The most significant debate in global economic history over the past twenty years has dealt with the Great Divergence, the economic gap between different parts of the world. Thus far, this debate has focused on China, India, and north-western Europe, particularly Great Britain. This book shifts the focus to ask how Japan became the only non-western country that managed at least partially to modernize its economy and start to industrialize in the 19th century. Using a range of empirical data, Peer Vries analyses the role of the state in Japan's economic growth from the Meiji Restoration to World War II and asks whether Japan's economic success can be attributed to the rise of state power. Asserting that the state's involvement was fundamental in Japan's economic catching up, he demonstrates how this was built on legacies from the previous Tokugawa period. In this book, Vries deepens our understanding of the Great Divergence in global history by re-examining how Japan developed and modernized against the odds. *Traditional Industry in the Economy of Colonial India* Tirthankar Roy, 1999-11-04 The majority of workers in South

Asia are employed in industries that rely on manual labour and craft skills Some of these industries have existed for centuries and survived great changes in consumption and technology over the last 150 years In earlier studies historians of the region focused on mechanized rather than craft industries arguing that traditional manufacturing was destroyed or devitalized during the colonial period and that modern industry is substantially different Exploring new material from research into five traditional industries Tirthankar Roy's book contests these notions demonstrating that while traditional industry did evolve during the Industrial Revolution these transformations had a positive rather than destructive effect on manufacturing generally In fact the book suggests the major industries in post independence India were shaped by such transformations Tirthankar Roy's book offers new and penetrating insights into India's economic and social history Japan and China in East Asian Integration Lim Hua Sing, 2008 Provides analyses on the politico economic relationship between Japan and China and a comparison of economic strengths between China and India in East Asian economic integration Provides an overall analysis on East Asian economic integration including some observations on the recent development and future prospects of the region **Asian Studies Newsletter**, 1992 **Paths to the Emerging State in Asia and Africa** Keijiro Otsuka, Kaoru Sugihara, 2019-01-16 This book is open access under a CC BY NC ND license This book addresses the issue of how a country which was incorporated into the world economy as a periphery could make a transition to the emerging state capable of undertaking the task of economic development and industrialization It offers historical and contemporary case studies of transition as well as the international background under which such a transition was successfully made or delayed by combining the approaches of economic history and development economics Its aim is to identify relevant historical contexts that is the initial conditions and internal and external forces which governed the transition It also aims to understand what current low income developing countries require for their transition Three economic driving forces for the transition are identified They are 1 labor intensive industrialization which offers ample employment opportunities for labor force 2 international trade which facilitates efficient international division of labor and 3 agricultural development which improves food security by increasing supply of staple foods The book presents a bold account of each driver for the transition
