Contemporary Issues in African Administration and Development Politics, 1990 **Rural Industrialization In Israel**
Raphael Bar-el, Ariela Nesher, Mosche Schwartz, Rachel Finkel, 2019-07-11 Rural development in Israel consists of a unique variety of industrialization experiences that may be instructive for many countries at various stages of development. The social, ideological, political, economic, and organizational precepts that Israel's rural settlements are based on lend themselves to many different approaches. This book deals with industrialization patterns in the kibbutz, the moshav, the non-agricultural village, and the Arab village. Prevailing conditions, size, and labor force availability of skills, infrastructure, and objectives, creation of employment, improvement of living standards, vary depending on the specific type of settlement. As a result, optimal policy for rural industrialization is different from village to village. The authors give the general background of and define the specific development objectives for each type of village. They review relevant conditions at the local and regional levels, analyze the individual experiences of industrial development, evaluate economic achievement and attainment of development goals, and determine influential factors. The final aim is to reassess Israeli policies and strategies and offer lessons to other countries undertaking rural industrialization.
