Forests at the wildland urban interface are at increasing risk due to the impacts of urbanization Conserving and managing these forestlands for continued ecological and social benefits is a critical and complex challenge facing natural resource managers land use planners and policymakers *Forests at the Wildland Urban Interface* Conservat **Environmental Management Accounting and Supply Chain Management** Roger L. Burritt,Stefan Schaltegger,Martin Bennett,Tuula Pohjola,Maria Csutora,2011-05-19 This volume s focus on the environmental accounting of supply chain processes is of particular relevance because these processes supply data about the environmental impact of relationships between business organisations an area where the boundary separating internal and external accounting is ill defined Here contributors advocate what they term accounting for cooperation as a more environmentally positive complement to the paradigmatic practice of accounting for competition **The Role of `Experts' in International and European Decision-Making Processes** Monika Ambrus,Karin Arts,Ellen Hey,Helena Raulus,2014-08-28 A broad gauged analysis of the issues raised by experts involvement in international and European decision making processes **The Interface Between EU and International Law** Inge Govaere,Sacha Garben,2019-05-16 Despite their many obvious interconnections EU and international law are all too often studied and practised in different spheres While it is natural for each to insist on its own unique characteristics and in particular for the EU to emphasise its sui generis nature important insights might be lost because of this exclusionary approach This book aims to break through some of those barriers and to show how more interaction between the two spheres might be encouraged In so doing it offers a constitutional dimension but also a substantive one identifying policy areas where EU and international law and their respective actors work alongside each other Offering a 360 degree view on both EU and international institutional and substantive law this collection presents a refreshing perspective on a longstanding issue **Environmental Management** Uberoi,2004-05 Environmental Management with few exceptions is not taught in colleges universities technical and management institutions The result is that the students of these institutions lack knowledge and sensitisation to environmental issues They lack the awareness of

environmental consequences of human actions To fill this void Environmental Management is timely The book provides background material to various environmental problems It surveys a range of topics from sustainable development and ecological imperatives to strategies for managing environmental issues The problem of pollution waste management biological diversity and forest management have been analysed in the light of laws and international conventions and treaties The book brings out the realities about the damage being inflicted on the environment and our exploitive attitude to nature It concludes with discussion and debate about values in nature and touches upon the subject of metamorphosis of the whole trajectory of attitudes in modern societies The Peri-Urban Interface Duncan McGregor,David Simon,2012-04-27 Peri

urban interfaces the zones where urban and rural areas meet suffer from the greatest problems to humans caused by rapid urbanization including intense pressures on resources slum formation lack of adequate services such as water and sanitation poor planning and degradation of farmland These areas home to hundreds of millions of people face unique problems and need distinctive and innovative approaches and solutions This book authored by top researchers and practitioners covers the full breadth and depth of the impacts of rapid urbanization on livelihoods poverty and resources in the peri urban zones in diverse African Asian Latin American and Caribbean contexts Topics include peri urban resource sustainability ecosystems and societies and environmental changes in peri urban zones Rich case studies cover production systems and livelihoods including the impacts of irrigated vegetable production horticulture dairy enterprises waste fed fisheries and pastoral livelihoods Also addressed are planning and development issues in the peri urban interface including the difficulty in achieving sustainability conflict and cooperation over resources and a fresh look at the relationship between people and their environment The final part of the book presents policies and strategies for promoting and measuring sustainability in peri urban zones including community based waste management the co management of watersheds and empowerment of the poor This book is the most comprehensive examination of the challenges and solutions facing the people and environments of peri urban zones and is essential reading for all practitioners students and academics in geography and development The

interface: new insight in placenta research, volume II Cilia Abad,Reinaldo Marín,Alicia E. Damiano ,Mariana Farina,2025-08-18 Given the success of the Maternal Fetal Interface New Insight in Placenta Research we are pleased to

announce the launch of Volume II The placenta is a fascinating and ephemeral organ of life which fulfils several functions to create and maintain optimal in utero conditions for fetal development and programming During its short period of time in the intrauterine cavity the fetus is dependent on the placenta as a lung liver and kidneys Functionally the placenta is a highly specialized organ which represents the interface between the mother and the fetus and is essential for fetal development and growth Apart from enabling oxygen and nutrient exchange the placenta produces various hormones neurotransmitters and other factors that regulate fetal development Extensive research over the last three decades has shown that a balanced interplay of genetic epigenetic and environmental factors is critical and must be maintained during the whole period of gestation so that the architecture and programming of a growing fetus can develop properly Nevertheless physiological alterations or insults occurring during pregnancy such as pathologies medication malnutrition may disrupt this balance and lead to poor pregnancy outcomes The timing of internal external alterations in pregnancy will result in different effects on fetal development and or programming This Research Topic will bring together research that addresses the new insights in maternal fetal interface research in health and disease We welcome original research articles clinical studies reviews and perspectives toward understanding the Maternal Fetal interface Specific themes include but are not limited to 1 Transport and metabolism of placenta 2 Transcriptome and epigenome of trophoblast 3 Pregnancy diseases 4 Metabolism studies on placenta organoids 5 Lipidomic on Health and Diseases of Pregnancy 6 COVID pregnancy and vaccines 7 Animal and cell models for study of pregnancy pathologies 8 Biology of trophoblast 9 Extracellular vesicles in pregnancy 10 Role of placenta in fetal programming 11 Brain placental axis
