through colonial histories and world literature *Goethe's Faust* Alan P. Cottrell, 2020-05-01 The essays in this collection range from close textual analysis to discussions of larger problems such as Goethe's relation to Christianity as illuminated by the theme of sacrifice in *Faust*. This work is viewed with particular reference to Goethe's natural scientific epistemology and to the problems confronting Western man in our own times. A study of Faust's blindness and the inner light complete the collection **Kant, Herder, and the Birth of Anthropology** John H. Zammito, 2002 If Kant had never made the critical turn of 1773 would he be worth more than a paragraph in the history of philosophy? Most scholars think not. But this text challenges that view by revealing a precritical Kant who was immensely more influential than the one philosophers think they know *The Brain-Eye* Eric Alliez, 2015-12-11 A detailed and inventive study of the thinking at work in modern painting drawing on a formidable body of scholarly evidence to challenge modernist and phenomenological readings of art history. *The Brain Eye* presents a series of interlinked case studies in which philosophical thought encounters the hallucinatory sensations unleashed by painter researchers. Rather than outlining a new philosophy of art, *The Brain Eye* details the singular problems pursued by each of its protagonists. Striking readings of the oeuvres of Delacroix, Seurat, Manet, Gauguin, and Cézanne recount the plural histories of artists who worked to free the differential forces of colour discovered by Goethe in his *Colour Theory* in the name of a true hallucination and of a logic proper to the Visual. A rigorous renewal of the philosophical thinking of visual art, *The Brain Eye* explores the complex relations between concept and sensation, theory and practice, the discursive and the visual, and draws out the political and philosophical stakes of the aesthetic revolution in modern painting.

Goethe and the Sciences: A Reappraisal F.R. Amrine, Francis J. Zucker, H. Wheeler, 2012-12-06 of him in like measure within myself that is my highest wish. This noble individual was not conscious of the fact that at that very moment the divine within him and the divine of the universe were most intimately united. So for Goethe the resonance with a natural rationality seems part of the genius of modern science. Einstein's cosmic religion which reflects Spinoza also echoes Goethe's remark. Ibid. Item 575 from 1829: Man must cling to the belief that the incomprehensible is comprehensible. Else he would give up investigating. But how far will Goethe share the devotion of these cosmic rationalists to the beautiful harmonies of mathematics so distant from any pure and direct observation? Kepler, Spinoza, Einstein need not and would not rest with discovery of a pattern within behind as a source of the phenomenal world, and they would not let even the most profound of descriptive generalities satisfy scientific curiosity. For his part Goethe sought fundamental archetypes as in his intuition of a *Urpflanze* basic to all plants infinitely plastic. When such would be found Goethe would be content for as he said to Eckermann Feb 18 1829 to seek something behind the *Urphänomenon* is futile. Here is the limit. But as a rule men are not satisfied to behold an *Urphänomenon*. They think there must be something beyond. They are like children who having looked into a mirror turn it around to see what is on the other side.
