Royal Society For The Protection Of Birds Year:

The Royal Society for the Protection of Birds Royal Society for the Protection of Birds,1937* The International Convention for the Protection of Birds Concluded in 1902 Ottó Herman,1907 **Zoological Society Bulletin** New York Zoological Society,1914 *Bird Notes and News* ,1922 *Year Book 1990* Patricia Dent,2013-10-22 This comprehensive yearbook is the only compendium in any language of policy scientific and legal developments concerning the occurrence regulation and control of marine pollution The breadth of scope of the volume reflects the increasing concern at all levels of government scientific enquiry and society with these issues Comprehensive updates of marine related legislation and the activities of a number of international and intergovernmental organisations are included Forewords to each chapter are contributed by prominent politicians and experts in the field of environmental science Over 200 references and numerous tables and illustrations augment the wealth of data within the text including several case studies and coverage of recent conventions In the light of increasing pressure on the marine environment from human activities the yearbook provides a unique contribution to the study of marine pollution worldwide *Hand-list of Short Titles of Current Periodicals in the Science Library* Science Museum (Great Britain). Library,1926 *Conservation Concepts* Kurt Jax,2023-10-31 This book provides a review of the multitude of conservation concepts both from a scientific philosophical and social science perspective asking how we want to shape our relationships with nature as humans and providing guidance on which conservation approaches can help us to do this Nature conservation is a contested terrain and there is not only one idea about what constitutes conservation but many different ones which sometimes are conflicting Employing a conceptual and historical analysis this book sorts and interprets the differing conservation concepts with a special emphasis on narrative analysis as a means for describing human nature relationships and for linking conservation science to practice and to society at large Case studies illustrate the philosophical issues and help to analyse major controversies in conservation biology While the main focus is on Western ideas of conservation the book also touches upon non Western including indigenous concepts The approach taken in this book emphasises the often implicit strategic and societal dimensions of conservation concepts including power relations In finding a path through the multitude of concepts the book showcases that it is necessary to maintain the plurality of approaches in order to successfully address different situations and societal choices Overall this book highlights the very tension which conservation biology must withstand between science and society between what is possible and what we want individually or as a society or even more what is desirable Bringing some order into this multitude will support more efficient conservation and conservation biology This book will be of great interest to students and scholars studying nature conservation from a variety of disciplines including biology ecology anthropology sociology geography and philosophy It will also be of use to professionals wanting to gain an understanding of the broad spectrum of conservation concepts and approaches and when to apply them **The January I Saved the World** Steve Moreby,2013-12-08 The

January I Saved the World is a practical response to Gandhi's challenge. We must be the change we want to see in the world. Written by Steve Moreby, environmental scientist and social justice activist, this book presents a day-by-day series of ideas and resources for making small improvements both to your own life and the world. The January I Saved the World takes 31 different ideas and finds the underlying rational basis for why they are likely to be effective in creating positive change. The first installment in a series, this ebook contains over a hundred links to a wide range of online resources.

The Atlas of Birds Mike Unwin, 2011-06-20. A stunning and authoritative full-color atlas of the world's birds. The Atlas of Birds captures the breathtaking diversity of birds and illuminates their conservation status around the world. Full-color maps show where birds are found both by country and terrain and reveal how an astounding variety of behavioral adaptations from flight and feeding to nest building and song have enabled them to thrive in virtually every habitat on Earth. Maps of individual journeys and global flyways chart the amazing phenomenon of bird migration while bird classification is explained using maps for each order and many key families. Conservation provides a strong focus throughout with maps illustrating where and why birds are most under threat and what is being done to protect them. Separate sections examine key factors influencing their distribution and endangering their survival from deforestation and climate change to invasive species and the cage bird trade. Bird groups most affected such as island endemics are highlighted while a fascinating chapter explores the complex historical relationship between birds and humans with maps and data for everything from poultry farming to birdwatching. The maps are supported by an authoritative text that uses the very latest data and case studies from BirdLife International. Packed with sumptuous photos, original diagrams and imaginative graphics that bring the numbers to life, this book is a stunning and timely insight into perhaps the most colorful and intriguing group of organisms on our planet. The premier illustrated atlas of bird diversity, behavior and conservation. Features full-color maps, photos and diagrams. Covers bird evolution, classification and behavior. Describes the complex relationship between birds and their habitats. Explores the impact of human activities on species survival. Illustrates where and why birds are most under threat and how to protect them.
