Natural History Of China:

China's Natural History Royal Asiatic Society of Great Britain and Ireland. North-China Branch. Museum, Shanghai Museum (R.A.S.), Arthur de Carle Sowerby, 1936 **The History of China** David Curtis Wright, 2020-10-06 Chinese society and culture are evolving with a booming economy expansion production of consumer and industrial goods and a growing influence upon the world The History of China enables readers to delve into the rich history of this powerful nation China is both the world's oldest continuing civilization and an emerging global super power Over the last two millennia this rich and complex nation has often been the wealthiest and most populous country on earth and within a few decades China may surpass all other nations as the most powerful in the world In this third edition of The History of China readers will find a general survey of China's long history ranging from accounts of ancient Chinese civilization to individual dynasties and its whirlwind transition to modernity and belated arrival into the international community An extensive new chapter discusses the emergence of Xi Jinping as China's paramount leader and the bold new directions in which he is taking the country and offers some speculations or predictions about where China is headed in the future Readers can also access an appendix of notable people in the history of China a timeline of historical events and a bibliographic essay Ideal for high school and undergraduate students this volume offers a lively engaging narrative of the rich history of Chinese civilization through to the 2010s **British Naturalists in Qing China** Fa-ti FAN, Fa-ti Fan, 2009-06-30 In the eighteenth and nineteenth centuries Western scientific interest in China focused primarily on natural history Prominent scholars in Europe as well as Westerners in China including missionaries merchants consular officers and visiting plant hunters eagerly investigated the flora and fauna of China Yet despite the importance and extent of this scientific activity it has been entirely neglected by historians of science This book is the first comprehensive study on this topic In a series of vivid chapters Fa ti Fan examines the research of British naturalists in China in relation to the history of natural history of empire and of Sino Western relations The author gives a panoramic view of how the British naturalists and the Chinese explored studied and represented China's natural world in the social and cultural environment of Qing China Using the example of British naturalists in China the author argues for reinterpreting the history of natural history by including neglected historical actors intellectual traditions and cultural practices His approach moves beyond viewing the history of science and empire within European history and considers the exchange of ideas aesthetic tastes material culture and plants and animals in local and global contexts This compelling book provides an innovative framework for understanding the formation of scientific practice and knowledge in cultural encounters Table of Contents Acknowledgments Introduction I The Port 1 Natural History in a Chinese Enterprise 2 Art Commerce and Natural History II The Land 3 Science and Informal Empire 4 Sinology and Natural History 5 Travel and Fieldwork in the Interior Epilogue Appendix Selected Biographical Notes Abbreviations Notes Index Fa ti Fan's study of the encounter between the British culture of the naturalist and the Chinese culture of the Qing is both a delight and a revelation

The topic has scarcely been addressed by historians of science and this work fills important gaps in our knowledge of British scientific practice in a noncolonial context and of Chinese reactions to Western science in the eighteenth and nineteenth centuries. In addition to the culture of Victorian naturalists and Sinology Fan shows an admirable grasp of visual representation in science. Chinese taxonomic schemes, Chinese export art, British imperial scholarship and journeys of exploration. His treatment of the China trade and descriptions of Chinese markets and nurseries are especially welcome. I learned a great deal and I strongly recommend this book. Philip Rehbock, author of *Philosophical Naturalists: Themes in Early Nineteenth Century British Biology*. By focusing on the experiences of British naturalists in China during a time when it was gradually being opened up to foreign influences, Fan makes at least two important contributions to history of science. He gives us an authoritative study of British naturalists in China as far as I know the only one of its kind and he forces us to rethink some of our categories for doing history of science including how we conceive of the relationship between science and imperialism and between Western naturalist and native. Fan's scholarship is meticulous with careful attention to detail and his prose is clear, controlled and succinct. Bernard Lightman, editor of *Victorian Science in Context*.

A History of Modern Shanghai Banking: The Rise and Decline of China's Financial Capitalism Ji Zhaojin, 2016-07-08. As the center of capitalism in China, Shanghai banking provides a unique perspective for assessing the impact of the changes from financial capitalism to socialist planning banking in the early 1950s and for evaluating the reform of China's banking system since the 1980s. This book offers a comprehensive history of Shanghai banking and capital markets from 1842 to 1952 and illustrates the non-financial elements that contributed to the revolutionary social and financial changes since the 1950s as well as financial experiences that are significant to China's economic development today. The book describes the rise and fall of China's traditional native banks, the establishment of foreign banks and the creation of modern state banks while focusing on the colorful world of banking, finance and international relations in modern Shanghai. It assesses the Chinese government's intervention in banking and finance during the Qing dynasty and the Republican era as well as the concept of state capitalism after the establishment of the People's Republic. The author examines various modern style Chinese banks through fascinating stories of Shanghai bankers. In addition, she provides detailed coverage of market-oriented international trade banking associations, the conflicts between state and society, the government involvement in business, the management of foreign exchange, joint venture banks, wartime banking and finance, hyperinflation, corruption and banking nationalization.
