A General Catalogue of Books in Every Department of Literature, for Public School Libraries in Upper Canada, 1857 **The Natural History of Insects** James Rennie, 1855 *The Natural History and Scientific Book Circular*, 1871 *A general catalogue of books in every department of literature, for public school libraries in Upper Canada. Sanctioned by the Council of Public Instruction. ... With the general provisions of the law and the regulations for the establishment of public libraries, etc* Ontario. Department of Education, 1857 **Insects and Colors between Art and Natural History**, 2024-10-28 This book explores how European naturalists and artists perceived, investigated, and presented the relationship between insects and colors from the late sixteenth to the late eighteenth century. The contributors to this volume examine the creative methods and strategies that were developed to record color-related information about insects through studies on Hoesnagel's glazed metal and hand coloring practices, the lepidochromy technique used in paintings by Marseus van Schrieck, and later naturalists' representation of sexual dimorphism of color and variable color of caterpillars in the images of Goedaert Merian, Albin and R. Sel von Rosenhof, the painting by numbers technique applied to Schiffer's bookplates on Regensburg insects, Schiffermüller's watercolor originals of caterpillars, and finally the color fading of exotic cabinet specimens and how this issue was tackled by Abbot and Smith. The volume is lavishly illustrated with rare and unpublished images and offers new insights into the interrelation between natural history and visual practices concerning the color of insects, with a special focus on butterflies and moths. Contributors are Harald Bruckner, Kay Etheridge, Beth Fowkes Tobin, Stefanie Jovanovic, Kruspel Karin, Leonhard V. E. Mandrij, Kimberly Schenck, Stacey Sell, Giulia Simonini, and Friedrich Steinle.

The Journal of Education for Upper Canada, 1852 The Art of Insect Illustration and Threads of Entomological History George E. Ball, Bruce Peel Special Collections Library, 2005-01-17 This catalogue explores the interrelationship between the science of entomology and the art of illustration by highlighting some of the key holdings of early and classic works on insects in the University of Alberta Library. George E. Ball demonstrates how advances in printing technologies from the sixteenth to the nineteenth centuries contributed to the developing body of entomological knowledge.

Foreword by Merrill Distad **The Journal of Education for Ontario ...** Egerton Ryerson, John George Hodgins, Adam Crooks, 1854 *The Flowering of Ecology* Kay Etheridge, 2020-11-04 The Flowering of Ecology presents an English translation of Maria Sibylla Merian's 1679 caterpillar book *Der Raupen wunderbare Verwandlung und sonderbare Blumen Nahrung*. Her processes in making the book and an analysis of its scientific content are presented in a historical context. Merian raised insects for five decades recording the food plants, behavior and ecology of roughly 300 species. Her most influential invention was an ecological composition in which the metamorphic cycles of insects—usually moths and butterflies—were arrayed around plants that served as food for the caterpillars. Kay Etheridge analyzes the 1679 caterpillar book from the viewpoint of a biologist, arguing that Merian's study of insect interactions with plants—the first of its kind—was a formative contribution to natural history.
