The Natural History of the Oxford District J. James, 1926 **The Natural History of Blenheim's High Park** Aljos
Farjon, 2024-08-08 High Park at Blenheim in Oxfordshire UK is a SSSI of great significance for its numerous ancient oaks and
the organisms associated with these trees This book gives a detailed lavishly illustrated and thoroughly researched
description of the biodiversity and natural history of what is by several measures the most significant site for ancient oaks in
Europe It draws together the expertise of more 60 specialists and reports on the results of in depth surveys of High Park
Chapters cover different groups including flora including bryophytes fungi lichens molluscs arachnids flies hymenoptera
butterflies moths beetles with a special focus on saproxylic species bugs reptiles and amphibians birds and mammals Despite
their undoubted importance very few sites with ancient oaks in England the most important European country for these
magnificent trees have seen a comprehensive published account adding to the value of this study Several of the contributing
authors describe their survey techniques in some detail some of which are not widely known Records are analysed in the
various chapters and often compared with data from other similar sites Overall the book gives encouraging evidence of the
great biodiversity still to be found in England and should help to stimulate similar efforts to uncover the biodiversity and
describe the natural history of ancient parkland and woodland so that conservation of these sites can be based on firm
scientific data **The Annals and Magazine of Natural History** ,1923 **The Natural History of the Oxford District.**
