Natural History Of Vision:

A Natural History of Vision Nicholas J. Wade, 2000-01-31 This illustrated survey covers what Nicholas Wade calls the observational era of vision beginning with the Greek philosophers and ending with Wheatstone's description of the stereoscope in the late 1830s

A Natural History of Seeing Simon Ings, 2008 Ings work delves into both the evolution of sight and the evolution of the human understanding of sight The book presents the natural science while also addressing the history philosophy and mythology of how and why people see the way they do Illustrations throughout

The Eye Simon Ings, 2007 We spend about one tenth of our waking hours completely blind Only one percent of what we see is in focus at any one time We exist in a world we see that's always about half a second behind the real one In fact you don't need eyes to see blind volunteers have been taught to see through their chests Wasps can't see but map their surroundings instead If we are stared at our heartbeat rises and our galvanic skin response alters How many generations did it take for the first fish to acquire eyes Answer is 400 000 Why do humans have whites to their eyes when other species don't Could it be that thinking arose as an evolutionary response to seeing Without eyes would minds exist at all Be prepared to have your eyes opened Using a spellbinding mix of scientific research mathematics philosophy history neuroscience anecdote and language theory in *The Eye* Simon Ings unravels brilliantly the never ending puzzle of how and why we see in the way that we do From looking at the work of a huge range of theorists and scientists to myths and personal experiences and with the help of a beguiling mix of illustrated visual conundrums and enigmas Ings triumphs with a compelling dissection of the age old mysteries of the eye that's both seriously interesting and interestingly fun He tells the eye's whole story for the very first time fusing eye and sight into a single story this is popular science of the highest order

Ecclesia Dei: a Vision of the Church. With a Preface, Notes, and Illustrations William John Blew,1848 **Empty Vision** David McMahan,2013-12-19 Visual metaphors in a number of Mahayana sutras construct a discourse in which visual

perception serves as a model for knowledge and enlightenment In the Perfection of Wisdom Prajnaparamita and other Mahayana literature immediate access to reality is symbolized by vision and set in opposition to language and conceptual thinking which are construed as obscuring reality In addition to its philosophical manifestations the tension between vision and language also functioned as a strategy of legitimation in the struggle of the early heterodox Mahayana movement for authority and legitimacy This emphasis on vision also served as a resource for the abundant mythical imagery in Mahayana sutras imagery that is ritualized in Vajrayana visualization practices McMahan brings a wide range of literature to bear on this issue Including a rare analysis of the lavish imagery of the Gandavyuha Sutra in its Indian context He concludes with a discussion of Indian approaches to visuality in the light of some recent discussions of ocularcentrism in the west inviting scholars to expand the current discussion of vision and its roles in constructing epistemic systems and cultural practices beyond its exclusively European and American focus
