Natural Lives Modern Times:

Natural Lives, Modern Times Bruce Stutz, 1998-07-29 Stutz has written a thoroughly modern natural history of the Delaware River blending keen observations of the nature of the Delaware's enduring complex of river glacial streams marshlands and forest with glimpses of history and folklore and with luminous portraits of those whose lives are sustained by the river

Bhagavad Gita for Modern Times Sada Shiva Tirtha, Swami Sadashiva Tirtha, 2007 Offers a modern interpretation of the Bhagavad Gita and provides suggestions on how its teachings can be applied to everyday life

Nietzsche and Modern Times Laurence Lampert, 1993-01-01 This major work by Laurence Lampert provides a new interpretation of modern philosophy by developing Nietzsche's view that genuine philosophers set out to determine the direction of culture through their ideas and that they conceal the radical nature of their thought by their esoteric style From this Nietzschean perspective Francis Bacon and Ren Descartes can be considered the founders of modernity Lampert argues that Bacon's positive claims for science aimed to destroy the dominance of Christianity Descartes continued Bacon's radical program while providing it with the mathematical physics required for its success Far from being solely an epistemological and metaphysical thinker says Lampert Descartes was a master writer whose comic ridicule helped bring down the Church to which he paid lip service Both Bacon and Descartes used the Platonic art of dissimulation to achieve their ends by making their revolutionary aims appear compatible with Christianity Once we recognize Bacon and Descartes as legislators of modern times in a specifically Nietzschean sense we can also see Nietzsche in a new way as the first thinker to have understood modern times and transcended it in a postmodern worldview According to Lampert Nietzsche provides a new foundation for culture a joyous science that reveals the grandeur and purposeless play of the cosmic whole and yet avoids enervating despair or destructive dogmatic belief

Nature in the Middle Ages and the Early Modern Times Albrecht Classen, 2024-07-01 The study of pre modern anthropology requires the close examination of the relationship between nature and human society which has been both precarious and threatening as well as productive soothing inviting and pleasurable Much depends on the specific circumstances as the works by philosophers theologians poets artists and medical practitioners have regularly demonstrated It would not be good enough as previous scholarship has commonly done to examine simply what the various writers or artists had to say about nature While modern scientists consider just the hard core data of the objective world cultural historians and literary scholars endeavor to comprehend the deeper meaning of the concept of nature presented by countless writers and artists Only when we have a good grasp of the interactions between people and their natural environment are we in a position to identify and interpret mental structures social and economic relationships medical and scientific concepts of human health and the messages about all existence as depicted in major art works In light of the current conditions threatening to bring upon us a global crisis it matters centrally to take into consideration pre modern discourses on nature and its enormous powers to understand the topoi and tropes determining the concepts through

which we perceive nature Nature thus proves to be a force far beyond all human comprehensibility being both material and spiritual depending on our critical approaches *The Congregational Year Book 1856 : Containing the Proceedings of the Congregational Union for 1855 and General Statistics of the Denomination ,1856* **From Grandmother's Wisdom:**
