Perspectives on Complementary and Alternative Medicine Tom Heller, Geraldine Lee-Treweek, Jeanne Katz, Julie Stone, Sue Spurr, 2005-02-01 This book explores the challenging issues associated with complementary and alternative medicine in the context of the social political and

cultural influences that shape people's health. Divided clearly into three sections, this book sets out the general context of social change, consumption, and debate around the rise of public interest in CAM, argues for and against different classifications of CAM, critically assesses the importance of ethics and values to CAM practice, and how these inform what practitioners do. It focuses on the question of what people want, the changing and contested nature of health, and the nature of personal and social factors associated with the use of CAM, leading to a focus on therapeutic relationships. It examines the diversity of settings in which CAM takes place and the social, political, and economic milieu in which CAM is provided and used. Together with its accompanying text, *Complementary and Alternative Medicine: Structures and Safeguards*, it forms the core text for the Open University course K221 *Perspectives on Complementary and Alternative Medicine*.

Evidence-Based Herbal and Nutritional Treatments for Anxiety in Psychiatric Disorders David Camfield, Erica McIntyre, Jerome Sarris, 2016-11-29. This book presents the current clinical evidence on the efficacy of herbal and nutritional treatments for anxiety that is experienced in association with psychiatric disorders and explains how health professionals can apply this knowledge to the benefit of patients presenting with a wide range of symptoms, including comorbid mood disorders. All chapters are written by world-leading researchers who draw on the findings of human clinical trials to provide uncompromising assessments of individual treatments, including herbal anxiolytics with sedative actions, adaptogens, cognitive anxiolytics, and nutraceuticals. Traditional treatments requiring further study, including the plant-based psychotropic Ayahuasca and other phytotherapies of potential value in the treatment of anxiety, are also reviewed. In the closing chapters, a series of helpful case studies are provided by mental health clinicians in order to illustrate how herbal and nutritional treatments can best be integrated into an overall treatment plan for individuals with a range of comorbid diagnoses. Mental health professionals, researchers, and general readers will find that the book provides an excellent review of current scientific knowledge gained from the study of herbal and nutritional treatments, together with important clinical recommendations for their use in patients experiencing clinically significant levels of anxiety.
