Natural Selection And Social Theory Selected Papers Of Robert Trivers:

Natural Selection and Social Theory Robert Trivers, 2002-09-05 Robert Trivers is a pioneering figure in the field of sociobiology. For Natural Selection and Social Theory he has selected eleven of his most influential papers including several classic papers from the early 1970s on the evolution of reciprocal altruism, parent-offspring conflicts, and asymmetry in sexual selection, which helped to establish the centrality of sociobiology as well as some of his later work on deceit in signalling, sex antagonistic genes, and imprinting. Trivers introduces each paper, setting them in their contemporary context and critically evaluating them in the light of subsequent work and further developments. The result is a unique portrait of the intellectual development of sociobiology with valuable insights for evolutionary biology, anthropology, and psychology. *Natural Selection and Social Theory* Robert Trivers, 2023

Contemporary Sociological Theory Doyle Paul Johnson, 2008-03-29 This volume is designed as a basic text for upper level and graduate courses in contemporary sociological theory. Most sociology programs require their majors to take at least one course in sociological theory, sometimes two. A typical breakdown is between classical and contemporary theory. Theory is perhaps one of the broadest areas of sociological inquiry and serves as a foundation or framework for more specialized study in specific substantive areas of the field. In addition, the study of sociological theory can readily be related to various aspects of other social science disciplines as well. From the very beginning, sociology has been characterized by alternative theoretical perspectives. Classical theory includes the European founding figures of the discipline whose works were produced during the latter half of the nineteenth century and the first couple of decades of the twentieth century, plus early American theorists. For most of the second half of the twentieth century, a fairly high consensus has developed among American sociologists regarding these major founders, particularly with regard to the works of Durkheim and Weber in analyzing the overall society and of Simmel in analyzing social interaction processes. Since the late 1960s and early 1970s, the influence of Marx has also been recognized. Recent decades have also witnessed an increased emphasis on the important contributions of several pioneering feminist perspectives in the early years of sociology.

Darwin's Bridge Joseph Carroll, Dan P. McAdams, Edward O. Wilson, 2016 *Darwin's Bridge: Uniting the Humanities and Sciences* explores the meaning of consilience and considers the unity of human evolution, human nature, social dynamics, art, and narrative. Bringing together cutting-edge scientists and scholars across a range of fields of knowledge production, this volume makes it possible to see how far we have come toward unifying knowledge about the human species, what major issues are still in contention, and what areas of research are likely to produce further progress.

Edgar Allan Poe, Eureka, and Scientific Imagination David N. Stamos, 2017-02-28 Explores the science and creative process behind Poe's cosmological treatise. In 1848, almost a year and a half before Edgar Allan Poe died at the age of forty, his book *Eureka* was published. In it, he weaved together his scientific speculations about the

universe with his own literary theory theology and philosophy of science Although Poe himself considered it to be his magnum opus *Eureka* has mostly been overlooked or underappreciated sometimes even to the point of being thought an elaborate hoax Remarkably however in *Eureka* Poe anticipated at least nine major theories and developments in twentieth century science including the Big Bang theory multiverse theory and the solution to Olbers paradox In this book the first devoted specifically to Poe's science side David N Stamos a philosopher of science combines scientific background with analysis of Poe's life and work to highlight the creative and scientific achievements of this text He examines Poe's literary theory theology and intellectual development and then compares Poe's understanding of science with that of scientists and philosophers from his own time to the present Next Stamos pieces together and clarifies Poe's theory of scientific imagination which he then attempts to update and defend by providing numerous case studies of *Eureka* moments in modern science and by seeking insights from comparative biography and psychology cognitive science neuroscience and evolution

Edgar Allan Poe *Eureka* and Scientific Imagination is the most comprehensive treatment of *Eureka* that has yet been published It is staggeringly thorough in its analysis of Poe's book but it also shows how Poe's theories of cosmogony and cosmology ramify into his fiction and poetry especially the tales of ratiocination Stamos takes *Eureka* seriously and he does so with the empirical undergirding of vast amounts of scientific scholarship and literary criticism James M Hutchisson author of Poe *Cognition and Communication in the Evolution of Language* Anne Reboul, 2017-03-16 This book proposes a new two step approach to the evolution of language whereby syntax first evolved as an auto organizational process for the human conceptual apparatus as a Language of Thought and this Language of Thought was then externalized for communication owing to social selection pressures Anne Reboul first argues that despite the routine use of language in communication current use is not a failsafe guide to adaptive history She points out that human cognition is as unique in nature as is language as a communication system suggesting deep links between human thought and language If language is seen as a communication system then the specificities of language its hierarchical syntax its creativity and the ability to use it to talk about absent objects are a mystery This book shows that approaching language as a system for thought overcomes these problems and provides a detailed account of both steps in the evolution of language its evolution for thought and its externalization for communication

Truth for Human Existence and Happiness Paul Sites, Danny Sites, 2010-07-23 This book is a response to postmodernists who take the position that there is no foundation for truth there are only stories We posit two types of truth truth about existence created by scientists which serves as a foundation of truth for existence Truth about existence describes human nature a major component being the human sense of self Following George Herbert Mead the self is not an entity it is process It is not substantiative it is functional There are two phases to the self the I phase and the Me phase The I phase has its roots in biology so when the needs of the self are not being gratified individuals suffer When individuals suffer life is without meaning individuals despair It is human needs and their inherent tie to suffering that points

the way to truth for human existence and happiness Because other people value what they need needs and their corresponding values serve as the foundation for truth about existence upon which truth for human existence is constructed

Islam and Evolution Shoaib Ahmed Malik, 2021-05-03 This book attempts to equip the reader with a holistic and accessible account of Islam and evolution It guides the reader through the different variables that have played a part in the ongoing dialogue between Muslim creationists and evolutionists This work views the discussion through the lens of al Ghaz l 1058 1111 a widely known and well respected Islamic intellectual from the medieval period By understanding al Ghaz l as an Ash arite theologian a particular strand of Sunni theology his metaphysical and hermeneutic ideas are taken to explore if and how much Neo Darwinian evolution can be accepted It is shown that his ideas can be used to reach an alignment between Islam and Neo Darwinian evolution This book offers a detailed examination that seeks to offer clarity if not agreement in the midst of an intense intellectual conflict and polarity amongst Muslims As such it will be of great interest to scholars of Science and Religion Theology Philosophy of Religion Islamic Studies and Religious Studies more generally Winner of the International Society for Science Religion ISSR book prize 2022 academic category *Myth of Universal Human Rights* David N. Stamos, 2015-11-17 In this groundbreaking and provocative new book philosopher of science David N Stamos challenges the current conceptions of human rights and argues that the existence of universal human rights is a modern myth Using an evolutionary analysis to support his claims Stamos traces the origin of the myth from the English Levellers of 1640s London to our modern day Theoretical defenses of the belief in human rights are critically examined including defenses of nonconsensus concepts In the final chapter Stamos develops a method of naturalized normative ethics which he then applies to topics routinely dealt with in terms of human rights In all of this Stamos hopes to show that there is a better way of dealing with matters of ethics and justice a way that involves applying the whole of our evolved moral being rather than only parts of it and that is fiction free
