Nature And Landscapes:

Nature and Landscape Allen Carlson, 2009 The roots of environmental aesthetics reach back to the ideas of eighteenth century thinkers who found nature an ideal source of aesthetic experience Today having blossomed into a significant subfield of aesthetics environmental aesthetics studies and encourages the appreciation of not just natural environments but also human made and human modified landscapes Nature and Landscape is an important introduction to this rapidly growing area of aesthetic understanding and appreciation Allen Carlson begins by tracing the development of the field's historical background and then surveys contemporary positions on the aesthetics of nature such as scientific cognitivism which holds that certain kinds of scientific knowledge are necessary for a full appreciation of natural environments Carlson next turns to environments that have been created or changed by humans and the dilemmas that are posed by the appreciation of such landscapes He examines how to aesthetically appreciate a variety of urban and rural landscapes and concludes with a discussion of whether there is in general a correct way to aesthetically experience the environment **Landscape**

Perspectives Marc Antrop, Veerle Van Eetvelde, 2018-01-09 Climb a mountain and experience the landscape Try to grasp its holistic nature Do not climb alone but with others and share your experience Be sure the ways of seeing the landscape will be very different We experience the landscape with all senses as a complex dynamic and hierarchically structured whole The landscape is tangible out there and simultaneously a mental reality Several perspectives are obvious because of language culture and background Many disciplines developed to study the landscape focussing on specific interest groups and applications Gradually the holistic way of seeing became lost This book explores the different perspectives on the landscape in relation to its holistic nature We start from its multiple linguistic meanings and a comprehensive overview of the development of landscape research from its geographical origins to the wide variety of today's specialised disciplines and interest groups Understanding the different perspectives on the landscapes and bringing them together is essential in transdisciplinary approaches where the landscape is the integrating concept *On Nature* Daniel Halpern, 1987 A collection of twenty four essays by writers concerned with nature and natural history including Italo Calvino Howard Ensign Evans Robert Finch Joyce Carol Oates and Edward Hoagland **The Nature of Landscape**, 1998* *The Nature of Landscape* Samuel Latta Kingan, 1920 **Nature, Place & People: Forging Connections Through Neighbourhood Landscape**

Design Puay-yok Tan, Kuei-hsien Liao, Yun Hye Hwang, Vincent Chua, 2018-04-23 Neighbourhood landscapes are the quintessential forms of urban landscapes in most cities worldwide They are pervasive and hence experienced by the large majority of urban dwellers in their everyday life More than parks nature reserves or nature areas which are visited as destinations neighbourhood landscapes provide the most immediate frequent and convenient form of nature experienced by urban dwellers on a daily basis They are also valuable as social spaces to bring residents together foster social ties and strengthen communities Despite their importance surprisingly little has been written to guide the planning and design of

neighbourhood landscapes This book is written for a specific purpose to illustrate how the design of neighbourhood landscapes helps to deliver more benefits for urban dwellers and at the same time protect ecosystems that facilitate human well being This is in turn important as the synergistic relationships between human well being quality of biophysical urban environment and health of human environment interactions fundamentally underpin urban sustainability The authors emphasize the role neighbourhood landscapes play in forging connections between people and nature people and people and people and place Most of all the book highlights the role of focusing on people in this endeavour as it is only when landscapes are appropriately designed and when people recognize these benefits that they become valued and protected as a community resource This book is organized into two parts Part 1 focuses on the conceptual foundations that underpin the neighbourhood landscape design guidelines being developed In this section the authors describe the key concepts relating functions of neighbourhood landscapes to the key urban development goals of sustainability liveability and reliance how they can be represented in a framework and how a synthesis of current knowledge of cities as socio ecological systems helps to identify principles that can guide the designing of neighbourhood landscapes Part 2 is more application focused and is centred on neighbourhood landscape design guidelines inspired by the concept of ecosystem services The guidelines consist of design approaches practical strategies design targets and performance monitoring indicators for tracking the performance of neighbourhood landscapes The book is written for readers in academia and design practice and anyone who has a role in shaping neighbourhood landscapes for the benefit of urban dwellers
