Nature In The Urban Landscape A Study Of City Ecosystems:

Nature in the Urban Landscape Don Gill, Penelope Bonnett, 1973 A discussion of city ecosystems planning for urban wildlife and management of urban wildlife habitats Studies on Los Angeles and its coyotes and London and its wildlife habitats are described **EPA-600/5**, 1974-02 **Natura Urbana** Matthew Gandy, 2022-03-08 A study of urban nature that draws together different strands of urban ecology as well as insights derived from feminist posthuman and postcolonial thought Postindustrial transitions and changing cultures of nature have produced an unprecedented degree of fascination with urban biodiversity The other nature that flourishes in marginal urban spaces at one remove from the controlled contours of metropolitan nature is not the poor relation of rural flora and fauna Indeed these islands of biodiversity underline the porosity of the distinction between urban and rural In *Natura Urbana* Matthew Gandy explores urban nature as a multilayered material and symbolic entity through the lens of urban ecology and the parallel study of diverse cultures of nature at a global scale Gandy examines the articulation of alternative and in some cases counterhegemonic sources of knowledge about urban nature produced by artists writers scientists as well as curious citizens including voices seldom heard in environmental discourse The book is driven by Gandy's fascination with spontaneous forms of urban nature ranging from postindustrial wastelands brimming with life to the return of such predators as wolves and leopards on the urban fringe Gandy develops a critical synthesis between different strands of urban ecology and considers whether urban political ecology broadly defined might be imaginatively extended to take fuller account of both the historiography of the ecological sciences and recent insights derived from feminist posthuman and postcolonial thought *The Routledge Handbook of Urban Ecology* Ian Douglas, P M L Anderson, David Goode, Michael C. Houck, David Maddox, Harini Nagendra, Puay Yok Tan, 2020-12-15 This second edition covers recent developments around the world with contributors from 33 different countries It widens the handbook's scope by including ecological design consideration of cultural dimensions of the use and conservation of urban nature the roles of government and civil society and the continuing issues of equity and fairness in access to urban greenspaces New features include an emphasis on the biophilic design of homes and workplaces demonstrating the value of nature in order to counter the still prevalent attitude among many developers that nature is a constraint rather than a value The volume explores great practical achievements that have occurred since the first edition with many governments increasingly recognizing and legislating on urban nature and green infrastructure matters since cities play a major role in adapting to change particularly to climate crisis New topics such as the ecological role of light at night and human microbiota in the urban ecosystem are introduced Additional attention is given to food production in cities particularly the multiple roles of urban agriculture and household gardens in different contexts from wealthy communities to the poorest informal settlements in deprived communities The emphasis is on demonstrating what can be achieved and what is already being done The book aims to help scholars and graduate students by providing an invaluable and up to date guide

to current urban ecological thinking across the range of disciplines such as geography ecology environmental science studies planning and urban studies that converge in the study of towns and cities and urban design and living It will also assist practitioners and civil society members in discovering the ways different specialists and thinkers approach urban nature

Routledge Handbook of Urban Landscape Research Kate Bishop, Linda Corkery, 2022-12-27 Landscape architecture is one of the key professions dedicated to making cities hospitable and healthy places to live work and play while respecting and enhancing the natural environments and landscapes we inhabit This edited collection presents current writing about the pivotal roles that landscape architects play in addressing some of the most pressing problems facing the planet its environments and its populations through their research analysis and speculative practice The book has assembled current writings on recent research structured around five major themes governance power and partnership infrastructure systems and performance environment resilience and climate change people place and design and culture heritage and identity As a collection the chapters demonstrate the diversity of themes and topics that are expanding the scholarly body of knowledge for the discipline and its relevance to the practice of landscape architecture The contributors to this book are academic researchers and practitioners from the discipline of landscape architecture The chapters draw on their research teaching and experience as well as analysis of project examples Fifty two contributors from the United States United Kingdom Sweden Denmark the Netherlands Nigeria Malaysia Spain Colombia Australia New Zealand and Canada discuss a diverse range of contemporary themes in urban landscape architecture Collectively the contributors demonstrate the breadth of experience shared concerns and distinct issues that challenge urban landscape architecture and cities in the 21st century

The Routledge Handbook on Historic Urban Landscapes in the Asia-Pacific Kapila Silva, 2019-12-23 The Routledge Handbook on Historic Urban Landscapes in the Asia Pacific sheds light onto the balancing act of urban heritage management focusing specifically on the Asia Pacific regions in which this challenge is imminent and in need of effective solutions Urban heritage while being threatened amid myriad forces of global and ecological change provides a vital social cultural and economic asset for regeneration and sustenance of liveability of inhabited urban areas worldwide This six part volume takes a critical look at the concept of Historic Urban Landscapes the approach that UNESCO promotes to achieve holistic management of urban heritage through the lens of issues prospects and experiences of urban regeneration of the selected geo cultural context It further discusses the difficult task that heritage managers encounter in conceptualizing mapping curating and sustaining the plurality poetics and politics of urban heritage of the regions in question The connective thesis that weaves the chapters in this volume together reinforces for readers that the management of urban heritage considers cities as dynamic entities palimpsests of historical memories collages of social diversity territories of contested identities and sites for sustainable liveability Throughout this edited collection chapters argue for recognizing the totality of the eco cultural urban fabric embracing change building social cohesion and initiating strategic socio economic progress in the conservation of Historic
