The Nature of Light. An Historical Survey ... Translated by V. Barocas* Vasco RONCHI, 1970 *Light And Vacuum: The Wave-particle Nature Of The Light And The Quantum Vacuum. Electromagnetic Theory And Quantum Electrodynamics Beyond The Standard Model (Second Edition)* Meis Constantin, 2017-03-03 Light and Vacuum presents a synthesis of selected fundamental topics of electromagnetic wave theory and quantum electrodynamics QED and analyzes the main theoretical difficulties encountered to ensure a coherent mathematical description of the simultaneous wave particle nature of light put in evidence by the experiments The notion and the role of the quantum vacuum strongly related to light are extensively investigated Classical electrodynamics issued from Maxwell's equations revealed the necessity of introducing the notion of volume for an electromagnetic wave to stand entailing precise values of cut off wavelengths to account for the shape and dimensions of the surrounding space Conversely in QED light is considered to be composed of point particles disregarding the conceptual question on how the frequency of oscillating electric and magnetic fields may be attributed to a point particle To conciliate these concepts the book provides a comprehensive overview of the author's work including innovative contributions on the quantization of the vector potential amplitude at a single photon state the non local simultaneous wave particle mathematical representation of the photon and finally the quantum vacuum The purpose of the advanced elaborations is to raise questions give hints and answers and finally aspire for further theoretical and experimental studies in order to improve our knowledge and understanding on the real essence of Light and Vacuum In this new edition improvements have been made to the various chapters taking into account the actual status of the knowledge in this field The photon wave function is further analyzed and a new concept of quantum vacuum is advanced compatible with recent astrophysical observations

Light as Experience and Imagination from Paleolithic to Roman Times David S. Herrstrom, 2017-09-26 This book is an interdisciplinary synthesis and interpretation about the experience of light as revealed in a wide range of art and literature from Paleolithic to Roman times Humanistic in spirit and in its handling of facts it marshals a substantial body of scholarship to develop an explication of light as a central even dramatic reality of human existence and experience in diverse cultural settings David S Herrstrom underscores our intimacy with light not only its constant presence in our life but its insinuating character Focusing on our encounters with light and ways of making sense of these this book is concerned with the personal and cultural impact of light exploring our resistance to and acceptance of light Its approach is unique The book's true subject is the individual's relationship with light rather than the investigation of light's essential nature It tells the story of light seducing individuals down through the ages Consequently it is not concerned with the progress of scientific inquiries into the physical properties and behavior of light optical science but

rather with subjective reactions to it as reflected in art Paleolithic through Roman architecture Egyptian Grecian Roman mythology and religion Paleolithic Egyptian and literature e g Akhenaten Plato Aeschylus Lucretius John the Evangelist Plotinus and Augustine This book celebrates the complexity of our relation to light s character No individual experience of light is truer than any other none improves on any previous experience of light s tidal pull on us And the wondrous variety of these encounters has yielded a richly layered tapestry of human experience By its broad scope and interdisciplinary approach this pioneering book is without precedent
