

NOTHING GOLD CAN STAY

BY ROBERT FROST

Nature's first green is gold,
Her hardest hue to hold.
Her early leaf's a flower;
But only so an hour.
Then leaf subsides to leaf.
So Eden sank to grief,
So dawn goes down to day.
Nothing gold can stay.

Kadiyan,2022-08-22 The book provides a comprehensive view of the environmental discourses that are found in the literary representations of the natural world The book presents an in depth analysis of the symbolic manifestations of the outer world in various genres of literature such as nature novels and nature or ecological writings It deeply captures the mutual interactions that occur between the human and the non human world that tend to influence each other s actions and processes By exploring the ecocritical leanings and tracing all the phases of Anthropocene the book takes its readers for a deep excursion into the beautiful dynamic natural and overtly spiritual world of Nature as exhibited in the writings such as Thoreau s Walden Khushwant Singh s Nature Watch and Starhawk s The Earth Path which is contrasted against the eco catastrophic world of Rachel Carson s Silent Spring An insightful and analytical journey into the world of more unique portrayals of the ecological world that tend to strike a balance between two distinct worlds the real and the imaginative the spiritual and the material as well as the natural and the man made as reflected in the nature novels George Eliot s Mill on the Floss Khushwant Singh s I Shall not Hear the Nightingale Starhawk s Fifth Sacred Thing and Ernest Callenbach s Ecotopia A Novel The book thus with its underpinning wisdom will be an interesting and more enlightening read for the critics academicians and researchers

discussion about alternate conceptualizations of nature and their significance. In particular, the work covers a wide array of textual and non-textual sources to link and understand nature from classical Indian philosophical perspectives as well as popular understandings in Indian literary texts and cultural practices. Popular issues in environmental philosophy are discussed in detail such as: What is nature in Indian philosophy? How do people perceive nature through landscape and mythological and cultural narratives? In what ways is nature sacred in India? To make the discussion relevant to contemporary readers, the book includes a section on the ecological and ethical implications of some philosophical concepts and critical perspectives on alternate conceptualizations of nature.
