Fuchs, Federico Corni, 2023-10-10 This open access book is the first of two volumes that integrates a study of direct encounters with Primary Forces of Nature Wind Light Rain Heat and Cold Water etc with imaginative narrative forms of communication The approach developed in this book shows how the growth of cognitive tools first of mythic and then of romantic forms of understanding lets children make sense of experiencing physical phenomena An in depth description of Fluids Gravity and Heat as Basic Forces shows how primary sense making can evolve into understanding of aspects of physical science allowing for a nature based pedagogy and application to environmental systems The final chapter introduces visual metaphors and theatrical storytelling that are particularly useful for understanding the role of energy in physical processes It explores how a mythic approach to nature can inform early science pedagogy This book is of interest to kindergarten and primary school teachers as well as early education researchers and instructors Chemistry and Biology of Water, Air and Soil J. Tölgyessy, 1993-03-11 Environmental pollution is a universal problem which threatens the continued existence of mankind rendering it one of the primary concerns of society This book provides a comprehensive view of the chemistry and biology of water air and soil particularly those aspects connected with the protection of the environment The first part of the book presents fundamental information on the chemistry and biology of water in its natural state and the effects of water pollution

from industry traffic agriculture and urbanization It covers the composition of natural service and wastewaters as well as methods of chemical and biological water analysis and water treatment The second part deals with atmospheric problems particularly the basic composition of atmosphere and the different sources of its pollution methods of restriction and air analysis The final part of the volume focuses on the characteristics of soil and soil components natural and anthropogenous soil processes the chemistry biology and microbiology of soil and soil analysis This book will be of great value to chemists biologists physicians pharmacists farmers veterinarians and university students as well as to those engaged in the sphere of environmental protection Water - its impurities gathered from the air and earth C.
