Gene Transcription R. J. White, 2009-04-01 Transcription is the focus of much cutting edge research as befits its essential place in biology The established link between defects in gene transcription and many human disorders has fuelled considerable activity in the biomedical arena particularly cancer research This concentration of attention has uncovered a myriad of factors involved in transcription and the literature is now rife with jargon and complexity *Gene Transcription Mechanisms and Control* aims to demystify the subject for a non expert audience providing a guided tour around the complex machinery of the transcriptional apparatus and discussing how the various factors achieve their functions By focusing on general principles and illustrating these with a select group of examples many of which are linked to human diseases the author conveys the intricacies of transcriptional control in an accessible manner With the first chapter presenting an overview of gene expression this is a stand alone text ideal for advanced level undergraduates and postgraduates in biology biochemistry and medical sciences It will also appeal to research scientists who require a broad current perspective on this rapidly moving and complex field Provides a broad and accessible introduction to gene transcription Up to date coverage of the major topics in a rapidly evolving field Illustrates the links between aberrant transcription and human disease Explains the jargon associated with transcription factors

Transcription Factors Joseph Locker, 2003-12-16 This book focuses on the DNA binding transcription factors and the proteins with which they directly interact It examines the regulatory systems that modulate gene expression in all cells and the more specialized systems that regulate localized gene expression throughout the mammalian organism

Cumulated Index Medicus, 1993

The Korean Neo-Confucianism of Yi Yulgok Young-chan Ro, 1989-01-01 This book explores the philosophical and religious dimensions of Korean Neo Confucianism as expounded by one of the foremost Korean Neo Confucian thinkers Yi Yulgok 1536 1584 Yulgok s creative interpretations reformulate some fundamental issues of Confucian philosophy This book explores the significance of the fundamental assumption which underlies the entire system of Yulgok s Confucian thought That philosophical assumption is characterized by the author as non dualistic and anthropocosmic It is a unique aspect of Korean Neo Confucianism which leads to a new way of understanding the Confucian world view and spirituality This non dualistic vision sheds a new and critical light on the dialectical framework of thinking at work in Western formulations of understanding the ultimate reality nature the universe and human being The anthropocosmic vision in this respect will challenge fundamental assumptions of Western theological formulation and suggest a new understanding of human nature and the universe A non dualistic and anthropocosmic interpretation of Yulgok s thought is a fruitful way of approaching the Korean way of thinking and of coming to grips with one Neo Confucian mode of attaining human self understanding
