Applications of NDT Data Fusion Xavier E. Gros, 2011-09-01 Non destructive testing NDT systems can generate incomplete incorrect or conflicting information about a flaw or a defect Therefore the use of more than one NDT system is usually required for accurate defect detection and or quantification In addition to a reduction in inspection time important cost savings could be achieved if a data fusion process is developed to combine signals from multisensor systems for manual and remotely operated inspections This gathering of data from multiple sources and an efficient processing of information help in decision making reduce signal uncertainty and increase the overall performance of a non destructive examination This book gathers for the first time essays from leading NDT experts involved in data fusion It explores the concept of data fusion by providing a comprehensive review and analysis of the applications of NDT data fusion This publication concentrates on NDT data fusion for industrial applications and highlights progress and applications in the field of data fusion in areas ranging from materials testing in the aerospace industry to medical applications Each chapter contains a specific case study with a theoretical part but also presents experimental results from a practical point of view The book should be considered more as a pragmatic introduction to the applications of NDT data fusion rather than a rigorous basis for theoretical studies

NDT Data Fusion Xavier Gros, 1996-11-01 Data fusion is a rapidly developing technology which involves the combination of information supplied by several NDT Non Destructive Testing sensors to provide a more complete and understandable picture of structural integrity This text is the first to be devoted exclusively to the concept of multisensor integration and data fusion applied to NDT The advantages of this methodology are widely acknowledged and the author presents an excellent introduction to data fusion processes Problems are approached progressively through detailed case studies offering practical guidance for those wishing to develop and explore NDT data fusion further This book will prove invaluable to inspectors students and researchers concerned with NDT signal processing measurements and testing It shows the great value and major benefits which can be achieved by implementing multisensor data fusion not only in NDT but also in any discipline where measurements and testing are key activities

thermography nuclear magnetic resonance imaging stress wave propagation impact echo surface and guided wave techniques and ultrasonics Part three covers case studies including inspection of concrete retaining walls using ground penetrating radar acoustic emission and impact echo techniques and using ground penetrating radar to assess an eight span post tensioned viaduct With its distinguished editor and international team of contributors Non destructive evaluation of reinforced concrete structures Volume 2 Non destructive testing methods is a standard reference for civil and structural engineers as well as those concerned with making decisions regarding the safety of reinforced concrete structures Reviews the latest non destructive testing NDT techniques and how they are used in practice Explores the process of planning a non destructive program features strategies for the application of NDT testing A specific section outlines significant advances in individual NDT techniques and features wireless monitoring and electromagnetic and acoustic elastic wave technology

Corrosion Control in the Aerospace Industry Samuel Benavides, 2009-01-21 Corrosion control in the aerospace industry has always been important but is becoming more so with the ageing of the aircraft fleet Corrosion control in the aerospace industry provides a comprehensive review of the subject with real world perspectives and approaches to corrosion control and prevention Part one discusses the fundamentals of corrosion and the cost of corrosion with chapters on such topics as corrosion and the threat to aircraft structural integrity and the effect of corrosion on aluminium alloys Part two then reviews corrosion monitoring evaluation and prediction including non destructive evaluation of corrosion integrated health and corrosion monitoring systems modelling of corrosion and fatigue on aircraft structures and corrosion control in space launch vehicles Finally Part three covers corrosion protection and prevention including chapters which discuss coating removal techniques novel corrosion schemes greases and their role in corrosion control and business strategies in fleet maintenance With its distinguished editor and team of expert contributors Corrosion control in the aerospace industry is a standard reference for everyone involved in the maintenance and daily operation of aircraft as well as those concerned with aircraft safety designers of aircraft materials scientists and corrosion experts Discusses the fundamentals of corrosion and the cost of corrosion to the aerospace industry Examines the threat corrosion poses to aircraft structural integrity and the effect of corrosion on the mechanical behaviour of aircraft Reviews methods for corrosion monitoring evaluation and prediction examining both current practices and future trends

Sensors, Nanoscience, Biomedical Engineering, and Instruments Richard C. Dorf, 2018-10-03 In two editions spanning more than a decade The Electrical Engineering Handbook stands as the definitive reference to the multidisciplinary field of electrical engineering Our knowledge continues to grow and so does the Handbook For the third edition it has expanded into a set of six books carefully focused on a specialized area or field of study Each book represents a concise yet definitive collection of key concepts models and equations in its respective domain thoughtfully gathered for convenient access Sensors Nanoscience Biomedical Engineering and Instruments provides thorough coverage of sensors materials and nanoscience instruments and measurements and

biomedical systems and devices including all of the basic information required to thoroughly understand each area It explores the emerging fields of sensors nanotechnologies and biological effects Each article includes defining terms references and sources of further information Encompassing the work of the world's foremost experts in their respective specialties Sensors Nanoscience Biomedical Engineering and Instruments features the latest developments the broadest scope of coverage and new material on multisensor data fusion and MEMS and NEMS

Structural Analysis of Historical Constructions: Anamnesis, Diagnosis, Therapy, Controls Koen Van Balen, Els Verstrynghe, 2016-11-03

Structural Analysis of Historical Constructions Anamnesis diagnosis therapy controls contains the papers presented at the 10th International Conference on Structural Analysis of Historical Constructions SAHC2016 Leuven Belgium 13-15 September 2016 The main theme of the book is Anamnesis Diagnosis Therapy Controls which emphasizes the importance of all steps of a restoration process in order to obtain a thorough understanding of the structural behaviour of built cultural heritage The contributions cover every aspect of the structural analysis of historical constructions such as material characterization structural modelling static and dynamic monitoring non destructive techniques for on site investigation seismic behaviour rehabilitation traditional and innovative repair techniques and case studies The knowledge insights and ideas in Structural Analysis of Historical Constructions Anamnesis diagnosis therapy controls make this book of abstracts and the corresponding digital full colour conference proceedings containing the full papers must have literature for researchers and practitioners involved in the structural analysis of historical constructions
