Injury and Health Risk Management in Sports Werner Krutsch, Hermann O. Mayr, Volker Musahl, Francesco Della Villa, Philippe M. Tscholl, Henrique Jones, 2020-04-21 This book is a comprehensive source of information and guidance on health risk management and medical care across the entire range of sports in athletes of all ages and ability. General health aspects, injury prevention, first aid and emergency management, diagnosis, treatment, rehabilitation and return to play are all addressed with presentation of practical recommendations throughout. All medical disciplines with relevance for athletes from psychological aspects to dermatological issues are as well as main pathologies, overuse injuries and indications for surgical treatment of all certain parts of the musculoskeletal system covered. Key features include a clear structure, short chapters in protocol format and the inclusion of helpful checklists and tips and tricks for a quick and in depth overview. Detailed attention is paid both to the medical care specific to injuries of different parts of the body and to special considerations relating to individual sports. Among the sport disciplines, team sports, athletics, winter sports, track and field, martial arts, motor sports and cycling, extreme sports, swimming and water sports, racket sports, other IOC sports and Paralympic sports are covered. Due to the rising population of certain modern non IOC sports e.g. E Sports, beach sports, flying sports and canyoning and paltry medical information in this disciplines, we put a focus on them. The book is a collaborative work from the newly created ESSKA section European Sports Medicine Associates ESMA which brings together the various disciplines of sports medicine. It will be an ideal resource and decision making tool for doctors, athletes, coaches and physiotherapists.
