Involving primary care clinicians in quality improvement, 2012 **Embedded Pharmacists in Primary Care** George E. MacKinnon III, Nathan Lamberton, 2021-06-08 As healthcare delivery moves from a provider centric approach to a more patient centric approach systems and payers need to reimagine how care and team based care is delivered to patients

and reimbursed Thus the goal should be to see the right patient by the right provider in the right place for the right price and where appropriate with the use of the right pharmaceuticals 5 P's There continues to be a reduction in physicians that are pursuing primary care roles in the United States thus exacerbating the ability to meet patient demand Most patient encounters begin with or end with the prescribing of medication Thus a future where pharmacists are embedded in primary care settings allows these pharmacists to collaborate at the point of prescribing i.e. in clinic and provides tremendous benefits to providers and patients The pharmacist workforce is educated at the doctoral level yet vastly underutilized and can assist in a collaborative approach in primary care The collection of articles in the Special Issue Embedded Pharmacists in Primary Care highlight examples of models that have included pharmacists in the ambulatory setting providing services in chronic disease management comprehensive medication management and care of specific conditions such as diabetes

Healthy China: Deepening Health Reform in China The World Bank,World Health Organization,2019-01-29 The report recommends that China maintain the goal and direction of its healthcare reform and continue the shift from its current hospital centric model that rewards volume and sales to one that is centered on primary care focused on improving the quality of basic health services and delivers high quality cost effective health services With 20 commissioned background studies more than 30 case studies visits to 21 provinces in China the report proposes practical concrete steps toward a value based integrated service model of healthcare financing and delivery including

- 1 Creating a new model of people centered quality integrated health care that strengthens primary care as the core of the health system This new care model is organized around the health needs of individuals and families and is integrated with higher level care and social services
- 2 Continuously improve health care quality establish an effective coordination mechanism and actively engage all stakeholders and professional bodies to oversee improvements in quality and performance
- 3 Empowering patients with knowledge and understanding of health services so that there is more trust in the system and patients are actively engaged in their healthcare decisions
- 4 Reforming public hospitals so that they focus on complicated cases and delegate routine care to primary care providers
- 5 Changing incentives for providers so they are rewarded for good patient health outcomes instead of the number of medical procedures used or drugs sold
- 6 Boosting the status of the health workforce especially primary care providers so they are better paid and supported to ensure a competent health workforce aligned with the new delivery system
- 7 Allowing qualified private health providers to deliver cost effective services and compete on a level playing field with the public sector with the right regulatory oversight and
- 8 Prioritizing public investments according to the burden of disease where people live and the kind of care people need on a daily basis
