Nature In The New World:

Nature, Action and the Future Katrina Forrester, Sophie Smith, 2018-01-25 Leading scholars of political thought demonstrate how the history of political ideas makes sense of environmental politics and climate change

Natural Science and the Origins of the British Empire Sarah Irving, 2015-09-30 Represents a history of the British Empire that takes account of the sense of empire as intellectual as well as geographic dominion the historiography of the British Empire with its preoccupation of empire as geographically unchallenged sovereignty overlooks the idea of empire as intellectual dominion

Decentring the Renaissance Germaine Warkentin, Carolyn Podruchny, 2001-01-01 Eighteen innovative essays explore not only how the European Renaissance helped form Canada but also how more significantly the experience of Canada touched the Renaissance and those who first came to the shores of North America

Magical Realism and the History of the Emotions in Latin America Jerónimo Arellano, 2015-05-21 Iconoclastic in spirit *Magical Realism and the History of the Emotions in Latin America* is the first study of affect and emotion in magical realist literature Against the grain of a vast body of scholarship it argues that magical realism is neither exotic commodity nor postcolonial resistance but an art form fueled by a search for spaces of wonder in a disenchanted world Linking the rise and fall of magical realism and kindred narrative forms to the shifting value of wonder as an emotional experience this thought provoking study proposes a radical new approach to canonical novels such as *One Hundred Years of Solitude* Received as one of the most convincing manifestations of the turn to affect in contemporary Latin American critical thought *Magical Realism and the History of the Emotions* draws on affect theory the history of emotions and new materialism to reframe key questions in Latin American literature and culture

A Politics of All Dean Caivano, 2024-04-08 No historical figure is more synonymous with establishing American democracy than Thomas Jefferson Revolutionary iconoclastic yet pragmatic the legacy of Jefferson as an intellectual and politician continues to reverberate across academic and public circles However Jefferson's writings on power authority and politics point to a different understanding of self government than dominant liberal and republican interpretations suggest Dean Caivano's interpretation of Jefferson's political anthropological and sociological meditations on power reveals an unknown Jefferson who conceives the American nation state as a network of dynamic autonomous communities enacted by a politics of all Caivano pointedly argues that this unknown Jefferson fittingly aligns with historical and contemporary projects of radical democracy stressing the need for constant resistance inquiry and dialogue In a period fraught with political division and hyper partisanship this timely innovative reading of Jefferson invites a reappraisal of how we understand a vital founder of the American republic and what is at stake in the battle to save American democracy
