Middeke, Christina Wald, 2011-11-18 This collection analyzes philosophical psycho analytic and aesthetic contexts of the discourse of melancholia in British and postcolonial literature and culture and seeks to trace the multi faceted phenomenon of melancholia from the early modern period to the present Texts discussed range from

Shakespeare and Milton to Coetzee and Barker *Discourses of Mourning in Dante, Petrarch, and Proust* Jennifer Rushworth, 2016 This book brings together in a novel and exciting combination three authors who have written movingly about mourning two medieval Italian poets Dante Alighieri and Francesco Petrarca and one early twentieth century French novelist Marcel Proust Each of these authors through their respective narratives of bereavement grapples with the challenge of how to write adequately about the deeply personal and painful experience of grief In Jennifer Rushworth's analysis discourses of mourning emerge as caught between the twin conflicting demands of a comforting readable shared generality and a silent solitary respect for the uniqueness of any and every experience of loss Rushworth explores a variety of major questions in the book including what type of language is appropriate to mourning What effect does mourning have on language Why and how has the Orpheus myth been so influential on discourses of mourning across different time periods and languages Might the form of mourning described in a text and the form of closure achieved by that same text be mutually formative and sustaining In this way discussion of the literary representation of mourning extends to embrace topics such as the medieval sin of acedia the proper name memory literary epiphanies the image of the book and the concept of writing as promise In addition to the three primary authors Rushworth draws extensively on the writings of Sigmund Freud Julia Kristeva Jacques Derrida and Roland Barthes These rich and diverse psychoanalytical and French theoretical traditions provide terminological nuance and frameworks for comparison particularly in relation to the complex term melancholia

Madness in Experience and History Hannah Lyn Venable, 2021-11-01 Madness in Experience and History brings together experience and history to show their impact on madness or mental illness Drawing on the writings of two twentieth century French philosophers Maurice Merleau Ponty and Michel Foucault the author pairs a phenomenological approach with an archaeological approach to present a new perspective on mental illness as an experience that arises out of common behavioral patterns and shared historical structures Many today feel frustrated with the medical model because of its deficiencies in explaining mental illness In response the author argues that we must integrate human experiences of mental disorders with the history of mental disorders to have a full account of mental health and to make possible a more holistic care Scholars in the humanities and mental health practitioners will appreciate how such an analysis not only offers a greater understanding of mental health but also a fresh take on discovering value in diverse human experiences **A Companion**

Psychiatry Jessica Wright, 2024-12-12 Is psychiatry a distinctively modern approach to mental difference and distress or is it a continuation of ancient Greek ideas in the realm not only of medicine consider melancholia but also of philosophy source of the idea of therapeutics of the soul and tragic drama inspiration for among other concepts the Oedipus complex This volume examines how psychiatry psychoanalysis and psychotherapy have been shaped by classical antiquity and ideas about antiquity and it explores the stories told about what this relationship between the psy disciplines and ancient Greece might mean Taking as a starting point the debate about what exactly mental illnesses might be Jessica Wright explores how contemporary tensions and debates reflect efforts to smooth over inconsistencies and discontinuities between ancient and modern ideas about illnesses affecting the mind The volume goes on to investigate key concepts that bridge classical antiquity and modern psychiatry showing how these ideas have been adapted and repurposed for new circumstances analysing how they are deployed to negotiate the legitimacy of current theories and demonstrating how the roles they play in psychiatry reshape our understandings of antiquity itself What emerges above all is how the process of examining the connections between modern psychiatry and classical antiquity whether historical constructed or imagined can illuminate modern ideas about mental illness approaches to treating it and its place in contemporary society and culture
