Nature Of Reality:

The Nature and Purpose of Reality Gary O Nickolaus, 2020-10-04 This book attempts to interpret the nature of reality as it is concurrently described by quantum physics but its concern is that which cannot be described with physics or mathematics it is about the first fraction of a second after the big bang when all physics and mathematics breaks down a big bang that was not a onetime occurrence but is rather an ongoing activity it is about the Planck length and Planck time where no measurements can be taken no observations can be made and deductive reasoning and subconscious awareness is our only means of understanding It is about the dual nature of reality described in Quantum Physics and interpreted by Theology It attempts to define how the finite and infinite combine to complete the purpose of the Absolute Reality of the Singularity It attempts to describe the nature of reality as a mosaic in which all the concepts fit together to form an Absolute Reality that has meaning and that has purpose where God is not an abstract principle or a separate being but is rather an integral part of the nature of Physics which is the nature of God It attempts to explain the concepts that have been demonstrated by scientific experimentation in a way to match these observations with that which we have previously assigned to theology and God All incorporated as the nature of existence and as such integral parts of Quantum Physics and Theology Physics is the study of the nature of our spacetime however Quantum Physics describes limits beyond which our science and math have no meaning The physics of spacetime is related to the physics of the finite While our physics can only describe with certainty the nature of spacetime extrapolations can be made as to the nature of the quantum wave as it exists in the infinite Singularity God cannot be separated from the physics for He is the Physics He is the nature and purpose of reality The dual nature of the universe demonstrated in quantum physics describes spacetime as a projection of the quantum probability wave With the actualization of the probability wave into spacetime all that we know is created How is this spacetime created How does the creation of spacetime form the attributes of this universe These are the questions Quantum Physic attempts to answer but more importantly what is the purpose of spacetime and what is the function of conscious beings within that purpose That question has been regulated to philosophy and theology but the answers are demonstrated in physics

The Nature of Reality Henry Ellington, 2020-12-03 This book presents a broad survey of how our ideas about the nature of reality have developed from the earliest prehistoric times to the present day It looks in detail at how religious philosophical and scientific views on the matter evolved and matured during the millennia before the start of the common era and continued to do so until the advent of the modern era in the 16th century It examines the development of modern science and philosophy showing how the Newtonian world picture was eventually overthrown by the Einsteinian revolution that began at the start of the 20th century It describes the development of modern astronomy and cosmology shows how our knowledge of the microscopic and subatomic worlds have both increased enormously and explores questions such as why the universe seems to be such a biofriendly place and why mathematics is so effective in describing many of its features It then discusses new

age thinking on reality takes a broad look at the rise of atheism and shows how information based pictures of reality are becoming increasingly influential It argues that reality may well consist of two distinct levels the phenomenal empirical world that we see around us and the hidden level that many people believe to lie beneath and beyond it It ends by suggesting ways in which this idea might be further explored **The Nature of Reality** Steven E. Kaufman,2023-10-03 What is The Nature

of Reality Contrary to what almost all human beings presently believe we do not live in a physical Universe because as The Nature of Reality explains physical reality is just an appearance that is being created by our minds and then superimposed by projection upon the non physical reality that is both actually there and what we really are The problem that arises as a result of believing physical reality to be the reality that is actually there is that that mistaken belief causes physical reality to function like a misperceived reflection to continuously obscure one s own reality from their awareness thereby effectively trapping one s awareness in what is nothing more than a mind generated experiential dream that is neither the reality that is actually there nor the reality that one really is The Nature of Reality was written to provide you with the opportunity to free yourself from that experiential dream and from the suffering being trapped in that dream produces by using fundamental scientific facts to demonstrate that physical reality is not the reality that is actually there where it appears to be so you can rid your mind of the false belief in physical reality that it is inadvertently using to convert physical reality into a delusion that continuously hides from your awareness the non physical reality you really are Whether you know it or not your awareness is presently trapping itself in a mind generated experiential dream as a function of what is nothing more than a mistaken belief The question is Are you ready to loosen your grip on that belief so you can begin to wake up and become aware of the reality you really are **Information and the Nature of Reality** Research Professor of Science and Theology Niels Henrik Gregersen,Paul Davies,2014-05-30 From quantum to biological and digital here eminent scientists philosophers and
