Nature Of Research Inquiry Into Academic Contexts:

The Nature of Research Angela Brew, 2002-11 What is wrong with research today This book argues that research priorities need to be reordered to address the concerns of today's society *The Nature of Research* Angela Brew, 2002-11-01 Increasingly new academics are entering higher education without conventional research training and without a clear idea of what research actually involves This is particularly true of academics who enter from having spent time in a profession including many in the newer disciplines In addition institutions of higher education which do not have a tradition of research are increasingly competing for research funding *The Nature of Research* looks at this background and discusses what is wrong with academic research and discusses what is wrong with academic research today what needs to change for it to survive how to allow new kinds of research to flourish directions for future action and how academic research can teach us to live in today's complex and uncertain society The aim of the book then is to provide a stimulus to thinking about the nature and role of research with a view to considering what might be appropriate in the next century Since research is so central to university life looking at research will tell us much about what the university of the future might be like **Synkrêtic 3** Daryl Morini, Christian Romuss, 2022-12-28 The journal Synkrêtic is an outlet for thought provoking writing on the philosophy literature and cultures of the Indo Pacific It showcases the diverse traditions of thought story telling and expression which are woven into the living tapestry of this culturally linguistically and politically complex region **The Routledge International Handbook of Higher Education** Malcolm Tight, Ka Ho Mok, Jeroen Huisman, Christopher Morphey, 2009-06-03 This volume is a detailed and up to date reference work providing an authoritative overview of the main issues in higher education around the world today Consisting of newly commissioned chapters and impressive journal articles it surveys the state of the discipline and includes the examination and discussion of emerging controversial and cutting edge areas *Academic Research and Researchers* Angela Brew, Lisa Lucas, 2009-10-16 University research is of central political cultural and economic importance for nations and is currently the subject of considerable debate and discussion in universities worldwide Research has become highly competitive though scarce resources In recent years research policies and strategies at different levels have called into question researcher autonomy problematised academic freedom created new disciplinary hierarchies skewed publication rates and processes created powerful ways to measure research outputs and demanded new working habits This book is concerned with how individual researchers experience and respond to this scenario It brings together research and scholarship examining the socio political context of university research and explores how researchers' perceptions and identities are changed by political and cultural agendas for research The book brings together the work of leading international scholars from different countries who have investigated theoretically and empirically the nature of research research cultures and academic researcher identities It brings together work that has hitherto only been reported in isolated and esoteric contexts internationally thus consolidating

the nature of research as an important field of study in its own right and providing important new understandings of how research is experienced in universities A range of different theoretical positions taken by different authors is indicative of a lively and robust field of developing knowledge Contributors Dr Gerlese S Akerlind Dr Christine Asmar Professor David Boud Dr Harry de Boer Dr Jurgen Enders Dr Margaret Kiley Dr Liudvika Leisyte Professor Alison Lee Dr Catherine Manathunga Professor Emeritus Ian McNay Dr Ocean Ripeka Mercier Dr Mari Murtonen Associate Professor Susan Page Professor Betty Rambur Professor Sir Peter Scott Professor Margaret Thornton Professor Malcolm Tight **Teach Truth to Power** David R. Garcia, 2022-02-08 How academics and researchers can influence education policy putting research in a policy context finding unexpected allies interacting with politicians and more Scholarly books and journal articles routinely close with policy recommendations Yet these recommendations rarely reach politicians How can academics engage more effectively in the policy process In *Teach Truth to Power* David Garcia offers a how to guide for scholars and researchers who want to influence education policy explaining strategies for putting research in a policy context getting in the room where policy happens finding unexpected allies interacting with politicians and more Countering conventional wisdom about research utilization also referred to as knowledge mobilization Garcia explains that engaging in education policy is not a science it is a craft a combination of acquired knowledge and intuition that must be learned through practice Engaging in policy is an interpersonal process academics who hope to influence policy have to get face to face with the politicians who create policy Garcia s experience as trusted insider researcher and political candidate make him uniquely qualified to offer a roadmap that connects research to policy He explains that academics can leverage their content expertise to build relationships with politicians even before they are politicians demonstrates the effectiveness of the research one pager and shows how academics can teach politicians to be champions of research *The PhD at the End of the World* Robyn Barnacle, Denise Cuthbert, 2021-03-02 This book addresses a world wide audience with reference to a global problem how the PhD can serve the planet It examines the role of the PhD in and of itself and as representative of research the university and evidence based knowledge in relation to global crisis and the future of humanity As such it speaks to the scholar the teacher the policy maker and the administrator concerned with the role of higher education s highest award at a time of great global crisis The approach is critical in that it offers diverse views on these issues and does not seek to privilege one single school of thought The collected articles span theoretical reflections on key issues through to case study examples of how PhDs are being deployed and re thought to address global issues **New Approaches to Qualitative Research** Maggi Savin-Baden, Claire Howell Major, 2010-04-08 Qualitative research has seen a surge of growth during the past decade This is in large part because positivist approaches have not yielded the kinds of results that had been anticipated and more researchers are seeking alternative perspectives to understand phenomena The number of researchers using qualitative approaches continues to grow yet there are few up to date guides to assist thinking broadly about qualitative research as a field of

inquiry Over the decades the range of approaches has increased which has led to an even greater lack of certainty about how to think about doing qualitative research In considering key issues while offering practical guidance on how to work within the face of uncertainty this book will be a valuable resource to this next generation of researchers New Approaches to Qualitative Research offers a clear understanding of the range of issues related to researcher stance the way that researchers position themselves in relation to their subjects their participants and their own belief systems and the way in which they locate themselves across the qualitative paradigm an overview of some of the most cutting edge qualitative techniques in use today from the exploration of visual texts to the concept of inquiry to synthesis methods this section lays out the state of the art in methodology specific information regarding processes of data analysis synthesis and interpretation that are employed in these various approaches In this book the authors take the stance that qualitative research is a broad approach that encompasses and even encourages difference and uncertainty and here at last they provide a route map to this uncertain but fruitful line of inquiry This vital text is ideal for professional researchers and postgraduates in a range of subject areas

Cultural Compatibility in Educational Contexts Kumi Kato,2010-02-23 Cultural Compatibility in Educational Contexts examines the mechanism of control and efficacy underlying specific cultural contexts intercultural value differences and consequential conflicts which invisibly and unintentionally cause communication difficulties and negative performances This specific study centers on Japanese language classrooms in Australia taught by native Japanese speakers Comparative studies were carried out in classrooms in both Japan and Australia and identified specific teaching strategies perceived to be effective in each cultural context The book concludes by asserting that the notion of culture in the educational context goes beyond ethnic and linguistic differences an awareness of cultural compatibility should be recognized as one of the professional responsibilities of all educators This is particularly relevant to multicultural societies such as Australia where both teaching and learning populations are increasingly diverse as well as being applicable to other social contexts

Research and Teaching in a Pandemic World Basil Cahusac de Caux,Lynette Pretorius,Luke Macaulay,2023-01-01 This book adopts collaborative autoethnography as its methodology and presents the collective witnessing of experiences of the COVID 19 pandemic within the higher education sector Through the presentation of staff and student experiences and what was learnt from them the authors examine the global phenomenon that is the COVID 19 pandemic through the purposeful exploration of their own experiences This book presents an overall argument about the state of higher education in the middle of the pandemic and highlights academic issues and region specific challenges The reflections presented in this book offer insights for other staff and students as well as academic policy makers regarding the pandemic experiences of those within academia It also offers practical suggestions as to how we as a global community can move forward post pandemic
