This volume of essays is meant as a tribute to Alistair Crombie by some of those who have studied with him. The occasion of its publication is his seven tieth birthday 4 November 1985. Its contents are a reflection or so it is hoped of his own interests and they indicate at the same time his influence on subjects he has pursued for some forty years. Born in Brisbane Australia Alistair Cameron Crombie took a first degree in zoology at the University of Melbourne in 1938 after which he moved to Jesus College Cambridge. There he took a doctorate in the same subject with a dissertation on population dynamics foreshadowing a later interest in the history of Darwinism in 1942. By this time he had taken up a research position with the Ministry of Agriculture and Fisheries in the Cambridge Zoological Laboratory a position he left in 1946 when he moved to a lectureship in the history and philosophy of science at University College London. H G Andrewartha and L C Birch in a survey of the history of insect ecology. R F Smith et al History of Entomology 1973 recognise the importance of the works of Crombie with which they couple the earlier work of Gause as the principal stimulus for the great interest taken in interspecific competition in the mid 1940s. **Comparative Literature: Sharing Knowledges for Preserving Cultural Diversity - Volume I** Lisa Block de Behar, Paola Mildonian, Jean-Michel Djian, Djelal Kadir, Alfons Knauth, Dolores Romero Lopez and Marcio Seligmann Silva, 2009-10-29 Comparative Literature Sharing Knowledges for Preserving Cultural Diversity theme is a component of Encyclopedia of Social Sciences and Humanities in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias.
