Nature And Spirit An Essay In Ecstatic Naturalism

Leon Niemoczynski, Nam T. Nguyen

Nature And Spirit An Essay In Ecstatic Naturalism:

Nature and Spirit Robert Corrington, 2021 *Nature and Spirit An Essay in Ecstatic Naturalism* develops an enlarged conception of nature that in turn calls for a transformed naturalism. Unlike more descriptive naturalisms such as those by Dewey, Santayana, and Buchler, ecstatic naturalism works out of the fundamental ontological difference between nature naturing (*natura naturans*) and nature naturred (*natura naturata*). This difference underlies all other variations within a generic conception of nature. The spirit operates within a generic conception of nature. The spirit operates within a fragmented nature and has its own unique locations. Ecstatic naturalism does not eulogize spirit nor impose a process theodicy upon nature as a whole but carefully describes the ways in which spirit emerges from finite locations within the world. Methodologically, the text radically regrounds phenomenology so that it can work more closely with a metaphysics seeking the most generic forms of nature. The move from a transcendental phenomenology which rests upon a profound misconception of the parcel of a radicalized naturalism makes it possible to show how all orders of relevance are related to nature and to the spirit. This in turn relocates the human process with its dialectical tension between finitude and transcendence and places the self fully within the emergent structures of the community of interpreters as that community lives out of hope. The concept of worldhood is regrounded in pragmatic and semiotic terms, thus putting pressure on Heidegger's formulations. Peirce's pragmatic categorical structure is used to show how worldhood differs from any other order within the world. The correlation of the potencies of nature which are presemiotic and preordinal with the orders of the world itself is possible only through an ordinal phenomenology that remains attuned to the fundamental difference between nature naturing the potencies and nature naturred the orders of the world. Finally, the text redefines the divine natures in the light of an ecstatic naturalism that sees God as an order within the world that experiences the fragmented quality of nature. Process theology is challenged for its inability to grasp the tensions between God and the encompassing. Four divine natures are laid bare as they relate to nature and to each other. The work concludes with a description of the divine life in the face of the encompassing.

Nature and Spirit Robert S. Corrington, 1992. Phenomenological descriptions are made of the human process and its struggles between its finite and transcendent dimensions. The self is located within both natural and interpretive, i.e., hermeneutic communities, and the semiotic implications of both types of community are detailed. The phenomenon of worldhood, i.e., that which is not a world or within the world but which locates and encompasses all worlds, is examined from the standpoint of a transformation of Heidegger's formulations. The pragmatic and semiotic dimensions of worldhood are defined in the context of an enlarged conception of nature. Finally, God's several dimensions are explored as they relate to each other and to the world within which they are often embedded. Process theology is challenged for its failure to explore what the author considers to be the fragmented yet self-transfiguring quality of the divine life.

Nguyen, 2014-11-12 A Philosophy of Sacred Nature introduces Robert Corrington's philosophical thought ecstatic naturalism which seeks to recognize nature's self transforming potential Ecstatic naturalism is a philosophical theological perspective deeply seated in a semiotic cosmology and psychosemiosis and it radically and profoundly probes into the mystery of nature's perennial self fissuring of nature natured and nature naturing Edited by Leon Niemoczynski and Nam T Nguyen this collection aims to allow readers to see what can be done with ecstatic naturalism and what directions interpretations and creative uses that doing can take A thorough exploration of the prospects of ecstatic naturalism this book will appeal to scholars of Continental philosophy religious naturalism and American pragmatism

Ecstatic Naturalism Robert S. Corrington, 1994 Semiotic theory which has restricted its focus largely to human forms of significations is transformed by Robert S Corrington into a semiotics of nature itself Corrington situates the divide between nature naturing and nature natured within the contest of classical American pragmatism and postmodern psychoanalysis At the heart of this new metaphysics is an insistence that all signs participate in larger orders of meaning that are natural and religious Meanings embodied in nature point beyond nature to the mystery inherent in positioned codes and signs
