Fundamental Research Committee, 1948 New and Future Developments in Microbial Biotechnology and Bioengineering Harikesh Bahadur Singh, Anukool Vaishnav, 2022-01-25 *New and Future Developments in Microbial Biotechnology and Bioengineering* Sustainable Agriculture Revitalization through Organic Products provides a comprehensive overview of different organic products which work as plant biostimulants i.e. protein hydrolysates, chitosan, microbial derived exopolysaccharides, pectin nanoparticles etc. In addition, detailed insights in their mechanisms for plant growth promotion and stress alleviation are covered. This volume further discusses the extraction and formulation of organic products for use in sustainable agriculture. The application of microbial derived secondary metabolites in crop protection is also extensively covered. This book will be ideal for agrochemists, biotechnologists, biochemists, industrialists, researchers and scientists working on organic farming. Comprises information on the various types of organic products and their applications in agriculture. Gives an insightful perspective on mechanisms of different organic products involved in plant growth promotion and stress management. Provides resourceful material for new ideas to develop organic formulations for agricultural practices Snack Foods Sergio O. Serna-Saldivar, 2022-04-20 The diverse segments of the snack industries that generate close to 520 billion of annual sales are adapting to new consumer's expectations especially in terms of convenience, flavor, shelf life and nutritional and health claims. *Snack Foods: Processing, Innovation and Nutritional Aspects* was conceptualized to thoroughly cover practical and scientific aspects related to the chemistry, technology, processing, functionality, quality control, analysis and nutrition and health implications of the wide array of snacks derived from grains, fruits, vegetables, milk and meat, poultry, seafood. This book focuses on novel topics influencing food product development like innovation, new emerging technologies and the manufacturing of nutritious and health promoting snacks with a high processing efficiency. The up-to-date chapters provide technical reviews emphasising flavored, salty snacks commonly used as finger foods including popcorn, wheat based products, crispbreads, pretzels, crackers, lime cooked maize snacks, tortilla chips and corn chips, extruded items, expanded and half products or pellets, potato chips, peanuts, almonds, tree nuts and products derived from fruits, vegetables, milk, animal and marine sources. **Key Features:** Describes traditional and novel processes and unit operations used for the industrial production of plant and animal based snacks. Depicts major processes employed for the industrial production of raw materials, oils, flavorings and packaging materials used in snack food operations. Contains relevant and updated information about quality control and nutritional attributes and health implications of snack foods. Includes simple to understand flowcharts, relevant information in tables and recent innovations and trends. Divided into four sections, *Snack Foods* aims to understand the role of the major unit operations used to process snacks like thermal processes including deep fat frying, seasoning, packaging and the emerging 3D printing technology. Moreover, the book covers the processing and characteristics of the most relevant raw

materials used in snack operations like cereal based refined grits starches and flours followed by chapters for oils seasoning formulations and packaging materials The third and most extensive part of the book is comprised of several chapters which describe the manufacturing and quality control of snacks mentioned above The fourth section is comprised of two chapters related to the nutritional and nutraceutical and health promoting properties of all classes of snacks discussed herein
