Urban Ecology for Citizens and Planners Gail Hansen, Joseli Macedo, 2021-11-09 This volume offers a wealth of information and examples for those looking to help bring urban environments into harmony with the natural world and make cities more sustainable

Aquatic Habitats in Sustainable Urban Water Management Iwona Wagner, Jiri Marsalek, Pascal Breil, 2014-04-21 Aquatic habitats supply a wide range of vital ecosystem benefits to cities and their inhabitants The unsustainable use of aquatic habitats including inadequate urban water management itself however tends to alter and reduce their biodiversity and therewith diminish their ability to provide clean water protect us from waterborne diseases and po

Urbanization is a global phenomenon and the book emphasizes that this is not just a social technological process It is also a social ecological process where cities are places for nature and where cities also are dependent on and have impacts on the biosphere at different scales from local to global The book is a global assessment and delivers four main conclusions Urban areas are expanding faster than urban populations Half the increase in urban land across the world over the next 20 years will occur in Asia with the most extensive change expected to take place in India and China Urban areas modify their local and regional climate through the urban heat island effect and by altering precipitation patterns which together will have significant impacts on net primary production ecosystem health and biodiversity Urban expansion will heavily draw on natural resources including water on a global scale and will often consume prime agricultural land with knock on effects on biodiversity and ecosystem services elsewhere Future urban expansion will often occur in areas where the capacity for formal governance is restricted which will constrain the protection of biodiversity and management of ecosystem services

Sourcebook on the Foundations of Social Protection Delivery Systems Kathy Lindert, Tina George Karippacheril, Inés Rodríguez Caillava, Kenichi Nishikawa Chávez, 2020-10-29 The Sourcebook on the Foundations of Social Protection Delivery Systems synthesizes real world experiences and lessons learned of social protection delivery systems

from around the globe It takes a broad view of social protection covering various intended populations such as poor or low income families unemployed workers persons with disabilities and individuals facing social risks It discusses many types of interventions that governments provide to individuals families or households including categorical programs poverty targeted programs labor benefits and services disability benefits and services and social services The Sourcebook seeks to address concrete how to questions including How do countries deliver social protection benefits and services How do they do so effectively and efficiently How do they ensure dynamic inclusion especially for the most vulnerable and needy How do they promote better coordination and integration not only among social protection programs but also among programs in other parts of government How can they meet the needs of their intended populations and provide a better client experience The delivery systems framework elaborates on the key elements of that operating environment The framework is anchored in core implementation phases along the delivery chain Key actors including people and institutions interact all along that delivery chain Those interactions are facilitated by communications information systems and technology This framework can apply to the delivery of one or many programs and to the delivery of adaptive social protection The Sourcebook structures itself around eight key principles that can frame the delivery systems mind set 1 There is no single blueprint for delivery systems but there are commonalities and those common elements constitute the core of the delivery systems framework 2 Quality of implementation matters and weaknesses in any of the core elements will negatively affect the entire system reducing the impacts of the program s they support 3 Delivery systems evolve over time in a nonlinear fashion and their starting points matter 4 Efforts should be made to keep it simple and to do simple well from the start 5 The first mile people s direct interface with administrative functions is often the weakest link in the delivery chain improving it may take systemic change but will greatly improve overall efficiencies and mitigate the risk of failures on the frontlines 6 Social protection programs do not operate in a vacuum and thus their delivery systems should not be developed in silos synergies across institutions and information systems are possible and can improve program outcomes 7 Social protection delivery systems can contribute more broadly to government s ability to serve other sectors such as health insurance subsidies scholarships social energy tariffs housing benefits and legal services 8 The dual challenges of inclusion and coordination are pervasive and perennial and encourage the continuous improvement of delivery systems through a dynamic integrated and human centered approach
