Natures Self Our Journey From Origin To Spirit:

Nature's Self Robert S. Corrington, 1995-12-19 In *Nature's Self* Robert Corrington develops a dramatic new perspective on the self in process probing the tension between our origins in the material and our fragmentary fulfillment in the spirit

Nature's Religion Robert S. Corrington, 1997 Corrington argues that signs and our various transference fields can and do connect us with fully natural religious powers that are not of our own making thereby opening up a path past the Western monotheisms to a capacious religion of nature With a foreword by Robert C Neville *Nature's Religion* is essential reading for philosophers of religion scholars of the psychology of religion and theologians

Nature's Transcendence and Immanence Jea Sophia Oh, Marilyn Lawrence, 2017-12-22 What does it mean for nature to be sacred Is anything supernatural or even unnatural *Nature's Transcendence and Immanence A Comparative Interdisciplinary Ecstatic Naturalism* discusses nature's divinizing process of unfolding and folding through East West dialogues and interdisciplinary methodologies Nature's serving god in processes are the sacred that is revealed as nature's transcendent and immanent dimensions Each chapter of *Nature's Transcendence and Immanence A Comparative Interdisciplinary Ecstatic Naturalism* shares a part of nature's sacred folds that are complexes within nature that have unusual semiotic density These discussions serve to help restore a better relationship to nature as a whole through an innovative combination of research and ideas from a variety of traditions and disciplines This collection not only introduces ecstatic naturalism and deep pantheism as sacred practices of philosophy and theology but also invites a broader audience from a wide range of academic disciplines such as neuro psychoanalysis aesthetics mythology neuroscience and artificial intelligence AI

Boston Confucianism Robert C. Neville, 2000-09-28 Argues that Confucianism can be important to the contemporary global conversation of philosophy and should not be confined to an East Asian context

Expanding Process John H. Berthrong, 2008-10-23 *Expanding Process* explores how comparative philosophy expands our understanding of the critical themes of process change and transformation John H Berthrong examines how notions of process manifest and shape the classical Confucianism of Xunzi the early medieval Daoism of the Liezi and Zhu Xi's Song Dynasty daoism Teaching of The Way Berthrong links these various Chinese views of process and transformation to contemporary debates in the American process pragmatic and naturalist philosophical movements Stressing how our pluralistic world calls for comparing and even appropriating insights from diverse cultural traditions Berthrong contends that comparative philosophy and theology can broaden the intellectual frontiers and foundations of any serious student of contemporary global thought

Signs in the Dust Nathan Lyons, 2019-02-28 Modern thought is characterized by a dichotomy of meaningful culture and unmeaning nature *Signs in the Dust* uses medieval semiotics to develop a new theory of nature and culture that resists this familiar picture of things Through readings of Thomas Aquinas Nicholas of Cusa and John Poinsett John of St Thomas it offers a semiotic analysis of human culture in both its anthropological breadth as an enterprise of creaturely sign making and its theological height as a finite participation in

the Trinity which can be understood as an absolute cultural nature Signs in the Dust then extends this account of human culture backwards into the natural depth of biological and physical nature It puts the biosemiotics of its medieval sources along with Félix Ravaisson's philosophy of habit into dialogue with the Extended Evolutionary Synthesis that is emerging in contemporary biology to show how all living things participate in semiosis so that that a cultural dimension is present through the whole order of nature and the whole of natural history It also retrieves Aquinas doctrine of intentions in the medium to show how signification can be attributed in a diminished way to even inanimate nature with the ontological implication that being as such should be reconceived in semiotic terms The phenomena of human culture are therefore to be understood not as breaks with a meaningless nature but instead as heightenings and deepenings of natural movements of meaning that long precede and far exceed us Against the modern divorce of nature and culture Signs in the Dust argues that culture is natural and nature is cultural through and through **Wilhelm Reich** Robert S. Corrington, 2003-07-14 Publisher
