Empire, Technology and Seapower Howard J. Fuller, 2014-01-03 This book examines British naval diplomacy from the end of the Crimean War to the American Civil War showing how the mid Victorian Royal Navy suffered serious challenges during the period Many recent works have attempted to depict the mid Victorian Royal Navy as all powerful innovative and even self assured In contrast this work argues that it suffered serious challenges in the form of expanding imperial commitments national security concerns precarious diplomatic relations with European Powers and the United States and technological advancements associated with the armoured warship at the height of the so called Pax Britannica Utilising a wealth of international archival sources this volume explores the introduction of the monitor form of ironclad during the American Civil War which deliberately forfeited long range power projection for local coastal command of the sea It looks at the ways in which the Royal Navy responded to this new technology and uses a wealth of international primary and secondary sources to ascertain how decision making at Whitehall affected that at Westminster The result is a better balanced understanding of Palmerstonian diplomacy from the end of the Crimean War to the American Civil War the early evolution of the modern capital ship including the catastrophic loss of the experimental sail and turret ironclad H M S Captain naval power projection and the nature of empire technology and seapower This book will be of great interest to all students of the Royal Navy and of maritime and strategic studies in general

The Law of Maritime Blockade Phillip Drew, 2017-12-08 Although appearing to be a relatively benign method of warfare when viewed from a distance a close examination of maritime blockade unveils a sinister character that can in cases where countries are highly reliant on imports of foodstuffs to feed their populations prove incredibly deadly particularly for the young and elderly This book is unique in that it is the only contemporary book that is dedicated to the study of the law of maritime blockade in the context of modern humanitarian law

Reviewing the development of blockade law over the past four centuries The Law of Maritime Blockade provides a historical analysis of the law as it emerged tracing its evolution through armed conflicts between 1684 and the present Referring to the starvation caused by the blockade of Germany during World War I and the humanitarian crisis caused by the sanctions regime against Iraq 1991 2003 this book demonstrates that blockade can have extremely deleterious effects for vulnerable civilian populations In this context the current law of blockade is examined and found to be deficient in terms of its protection for civilians Recognizing and advocating that blockade should remain as a valid and effective method of warfare the book offers a template for a modern law of maritime blockade that incorporates many of the traditional aspects of the law while reducing the possibilities that blockades can cause or exacerbate humanitarian disasters **Sea Power and the**

Asia-Pacific Geoffrey Till, Patrick Bratton, 2012-02-07 This volume examines the rise and fall of sea powers in the Asia Pacific region Seapower Geoffrey Till, 2018-06-19 This is the fourth revised and updated edition of Geoffrey Till's Seapower A

Guide for the Twenty first Century The rise of the Chinese and other Asian navies worsening quarrels over maritime jurisdiction and the United States maritime pivot towards the Asia Pacific region reminds us that the sea has always been central to human development as a source of resources and as a means of transportation information exchange and strategic dominion It has provided the basis for mankind's prosperity and security and this is even more true in the early twenty first century with the emergence of an increasingly globalised world trading system Navies have always provided a way of policing and sometimes exploiting the system In contemporary conditions navies and other forms of maritime power are having to adapt in order to exert the maximum power ashore in the company of others and to expand the range of their interests activities and responsibilities While these new tasks are developing fast traditional ones still predominate Deterrence remains the first duty of today's navies backed up by the need to fight and win if necessary How navies and their states balance these two imperatives will tell us a great deal about our future in this increasingly maritime century This book investigates the consequences of all this for the developing nature composition and functions of all the world's significant navies and provides a guide for anyone interested in the changing and crucial role of seapower in the twenty first century Seapower is essential reading for all students of naval power maritime security and naval history and highly recommended for students of strategic studies international security and international relations

Small Powers in the Age of Total War, 1900-1940 Herman Amersfoort, Wim Klinkert, 2011-04-11 In the period 1900 1940 the Netherlands Belgium Denmark Norway and Switzerland reacted in divergent ways to the same foreign military threats This volume argues that their internal politics and politico military strategic culture are vital keys to understanding those differences **Taiwan Straits** Bruce A.

Elleman, 2014-12-16 In Taiwan Straits Crisis in Asia and the Role of the U S Navy historian Bruce Elleman surveys the situation that has led to the current tensions between China and Taiwan Starting in 1949 the final phase of the civil war in China which ended with Communist rule of the mainland and nationalist control of Taiwan this work explores how the 100

mile wide passage of water known as the Taiwan Strait has served as the geographic flashpoint between the two nations. Even though U S Navy destroyers have patrolled this body of water from 1950 to 1979 it has seen four crises 1954 55 1958 1962 and after the withdrawal of the U S Navy 1995 96 that threatened to push Taiwan and China to the brink of war. Notwithstanding the role of the United States in defusing cross strait tensions for some three decades and the cold peace that has settled in since then the Taiwan Strait continues to be a major source of anxiety for the region and the world. Taiwan Straits Crisis in Asia and the Role of the U S Navy traces the evolution of this tension between the two nations details the history of the crises between them and brings this story forward into the present by considering continuing sources of conflict present diplomatic efforts by the aggrieved nations and other key interests from the United States and Europe to other regional powers and future possible outcomes in the ongoing struggle between China and Taiwan relations. Simply written and cogently argued it is the ideal source for military personnel diplomats and scholars and student of the modern Far East.

Great Britain, International Law, and the Evolution of Maritime Strategic Thought, 1856-1914 Gabriela A. Frei, 2020 Gabriela A Frei examines how sea powers used international law as an instrument in foreign policy in the nineteenth and early twentieth centuries illuminating key developments of international maritime law surrounding state practice custom and codification and outlining the complex relationship between international law and maritime strategy.

The Pacific Campaign in World War II William Bruce Johnson, 2006-05-02 This is a fascinating new account of how diplomacy and politics gave way to military strategy and warfare in the Pacific. Presenting previously unpublished documents this book freshly examines the key events in the fight for the Pacific.
