Zeitzen,2020-06-15 Forms of plural marriage or polygamy are practiced within most of the world's cultures and religions. The amazing variation, versatility and adaptability of polygamy underscore that it is not just an exotic non-Western practice but also exists in modern Western societies. Polygamy: A Cross cultural Analysis provides an examination and analysis of historical and contemporary polygamy. It outlines polygamy's place in anthropological theory and its rich sociocultural diversity in countries ranging from the USA and UK to Malaysia, India, regions of Africa and Tibet. Polygamy also addresses often difficult and controversial issues facing modern polygamists such as prejudice, HIV/AIDS and women's emancipation. Polygamy: A Cross cultural Analysis offers an anthropological overview of the fascinating yet often misunderstood institution of polygamy.

The Oxford Encyclopedia of Women in World History Bonnie G. Smith, 2008. The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive 4 volume work. Although there has been extensive research on women in history by region, no text or reference work has comprehensively covered the role women have played throughout world history. The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe. Historians have investigated women's daily lives in virtually every region and have researched the leadership roles women have filled across time and region. They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been affected. The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes. The Encyclopedia contains over 1,250 signed articles arranged in an A-Z format for ease of use. The entries cover six main areas: biographies, geography and history, comparative culture and society, including adoption, abortion, performing arts, organizations and movements such as the Egyptian Uprising and the Paris Commune, women and gender studies, and topics in world history that include slave trade, globalization and disease. With its rich and insightful entries by leading scholars and experts, this reference work is sure to be a valued go-to resource for scholars, college and high school students and general readers alike. **Matrilineal Kinship** David Murray Schneider, Kathleen Gough, 1961 A Field of One's Own Bina Agarwal, 1994. This is the first major study of gender and property in South Asia. In a pioneering and comprehensive analysis, Bina Agarwal argues that the single most important economic factor affecting women's situation is the gender gap in command over property. In rural South Asia, the most significant form of property is arable land, a critical determinant of economic well-being, social status and empowerment. But few women own land, fewer control it. Drawing on a vast range of interdisciplinary sources and her own field research and tracing regional variations across five countries, the author investigates the complex barriers to women's land ownership and control and how they might be overcome. The book makes significant and original contributions to theory and policy.
