Neanderthals And Modern Humans An Ecological And Evolutionary Perspective:

Neanderthals and Modern Humans Clive Finlayson, 2004-03-11 *Neanderthals and Modern Humans* develops the theme of the close relationship between climate change ecological change and biogeographical patterns in humans during the Pleistocene In particular it challenges the view that Modern Human superiority caused the extinction of the Neanderthals between 40 and 30 thousand years ago Clive Finlayson shows that to understand human evolution the spread of humankind across the world and the extinction of archaic populations we must move away from a purely theoretical evolutionary ecology base and realise the importance of wider biogeographic patterns including the role of tropical and temperate refugia His proposal is that Neanderthals became extinct because their world changed faster than they could cope with and that their relationship with the arriving Modern Humans where they met was subtle *When Neanderthals and Modern Humans Met*

Nicholas John Conard, 2006 *A Companion to Biological Anthropology* Clark Spencer Larsen, 2010-02-22 An extensive overview of the rapidly growing field of biological anthropology chapters are written by leading scholars who have themselves played a major role in shaping the direction and scope of the discipline Extensive overview of the rapidly growing field of biological anthropology Larsen has created a who's who of biological anthropology with contributions from the leading authorities in the field Contributing authors have played a major role in shaping the direction and scope of the topics they write about Offers discussions of current issues controversies and future directions within the area Presents coverage of the many recent innovations and discoveries that are transforming the subject **The World from Beginnings to 4000 BCE**

Ian Tattersall, 2008-02 In this lively and readable introduction renowned anthropologist Ian Tattersall thoroughly examines both fossil and archaeological records to trace human evolution from the earliest beginnings of our zoological family Hominidae through the appearance of *Homo sapiens* to the Agricultural Revolution *THE EMERGENCE AND NATURE OF HUMAN HISTORY Volume One* Joseph Miller, 2012-07-29 This book attempts to define the issues that face us in trying to understand the often overwhelming complexity of the human experience It is intellectually challenging broad in its scope richly detailed and densely argued It is the first in a projected series of five volumes in which the author will seek to touch on every aspect of human historical reality and all the multitudinous variables that have shaped it **Vanished**

Sadiya Qureshi, 2025-06-05 A vital and important book David Olusoga From an award winning historian of race science and empire a path breaking and poignant history of extinction as a scientific idea an imperial legacy and a political choice Anyone alive today is among a tiny fraction of the once living over 90% of species that ever existed are now extinct How did we come to think of ourselves as survivors in a world where species can vanish forever or as capable of pushing our planet to the verge of a sixth mass extinction Extinction Sadiya Qureshi shows us is a surprisingly modern concept and a phenomenon that is not as natural as we might think In Europe until the late eighteenth century species were considered perfect and unchanging creations of God Then in the age of revolutions scientists gathered enough fossil evidence to determine that

mammoth bones for example were not just large elephants but a lost species that once roamed the Earth alongside ancient humans Extinction went from being regarded as theologically dangerous to pervasive and even inevitable Yet Vanished shows us that extinction is more than a scientific idea it s a political choice that has led to devastating consequences Europeans and Americans quickly used the notion that extinction was a natural process to justify persecution and genocide predicting that nations from Newfoundland s Beothuk to Aboriginal Australians were doomed to die out from imperial expansion Exploring the tangled and unnatural histories of extinction and empire Vanished weaves together pioneering original research and breath taking storytelling to show us extinction is both an evolutionary process and a human act one which illuminates our past and may alter our future

Archaeologies of Cultural Contact Timothy Clack, Marcus Brittain, 2022-08-11 Archaeologies of Cultural Contact undertakes an exploration of cultural transfer with a particular focus on the combination and modification of both material and behavioural attributes under conditions of contact From globalization and displacement to cultural legitimization and identity politics the modern world is characterised by and articulated through dynamics of contact and transfer This book recognises that creolization ethnogenesis hybridity and syncretism are analytical concepts and social processes relevant not only to the postcolonial contexts of the twentieth century but also to wide ranging instances where contact is made between cultural groups Indeed in representing the reworking of pre existing cultural elements they were crucial and ever present features of the human past Ranging in their analytical frame scale and geographical and temporal location the chapters in this volume demonstrate the diverse understandings that can be gained from explorations into the material remains of past contact exposing and overcoming various limitations of competing models of cultural change They permit insights into not only cultural change and difference but also the processes of appropriation resistance redefinition and incorporation Together the contributions articulate the perspectives that concern practices in relations to people places and things and note how power dynamics mediate social interactions and sustain and constrain forms of cultural contact This book will be of interest to researchers and students in archaeology as well those from cognate disciplines particularly anthropology and history

How To Think Like a Neandertal Thomas Wynn, Frederick L. Coolidge, 2012-01-26 In this book the authors provide a fascinating narrative of the mental life of Neandertals to the extent that it can be reconstructed from fossil and archaeological remains

High Resolution Archaeology and Neanderthal Behavior Eudald Carbonell i Roura, 2012-03-15 The aim of this book is to provide a new insight on Neanderthal behaviour using the data recovered in level J of Roman rockshelter north eastern Spain Due to the sedimentary dynamics that formed the Roman deposit the occupation layers are characterized by a high temporal resolution which makes it easier to interpret the archaeological data in behavioural terms In addition the different analytical domains geoarchaeology lithic technology zooarchaeology taphonomy anthracology palaeontology are addressed from a spatial perspective that is basic to understand human behaviour but also to evaluate the behavioural inferences in the

framework of the archaeological formation processes **The Middle and Upper Paleolithic Archeology of the Levant and Beyond** Yoshihiro Nishiaki, Takeru Akazawa, 2017-12-06 This volume is a compilation of results from sessions of the Second International Conference on the Replacement of Neanderthals by Modern Humans which took place between November 30 and December 6 2014 in Hokkaido Japan Similar to the first conference held in 2012 in Tokyo the 2014 conference RNMH2014 aimed to compile the results of the latest multidisciplinary approaches investigating the issues surrounding the replacement of Neanderthals by modern humans The results of the sessions supplemented by off site contributions center on the archeology of the Middle and Upper Paleolithic of the Levant and beyond The first part of this volume presents recent findings from the Levant while the second part focuses on the neighboring regions namely the Caucasus the Zagros and South Asia The 13 chapters in this volume highlight the distinct nature of the cultural occurrences during the Middle and Upper Paleolithic periods of the Levant displaying a continuous development as well as a combination of lithic traditions that may have originated in different regions This syncretism which is an unusual occurrence in the regions discussed in this volume reinforces the importance of the Levant as a region for interpreting the RNMH phenomenon in West Asia
