Envisioning Our Environmental Future Bharat H. Desai,2022-09-15 With the Stockholm 50 Conference held on 23 June 2022 the global movement to protect the environment has reached a 50 year milestone The first UN Conference on the Human Environment also held in Stockholm from 5-16 June 1972 proved to be the watershed in addressing this problem and as the world assembles once more in the Swedish capital it is time to think aloud and look ahead In his address in 1972 the then Swedish Prime Minister Olof Palme said The decisive question is in which direction we will develop there is no individual future neither for people nor for nations The only other head of government to attend in 1972 Indian Prime Minister Indira Gandhi highlighted the development as one of the primary means of improving the environment of living of providing food water sanitation and shelter of making the deserts green and mountains habitable and drew attention to the wisdom of the Atharva Veda What of thee I dig out Let that quickly grow over Let me not hit thy vitals or thy heart As we look back over 50 years we need to assess what has gone wrong in the trajectory travelled so far and look ahead to the future of our environment at this juncture and beyond As a scholarly journal for global decision makers Environmental Policy and Law has sought to envision what lies ahead in the 21st century by inviting outstanding scholarly works from around the world The 22 articles which resulted from this invitation are presented in this book Envisioning Our Environmental Future which is organised in three parts Testing Times Global Ideas and Sectoral Ideas The book is a sequel to Our Earth Matters IOS Press which was published on 5 June 2021 Bharat H Desai is Professor of International Law and Jawaharlal Nehru Chair in International Environmental Law at the Centre for International Legal Studies School of International Studies of Jawaharlal Nehru University New Delhi He is Editor in Chief of the global journals Environmental Policy and Law Amsterdam IOS Press and Yearbook of International Environmental Law Oxford Oxford University Press Prof Desai s ideas and proposals are reflected in his published books and in journals of international repute *Impacts of Climate Change on Food Security in Small Island Developing States* Ganpat, Wayne G.,Isaac, Wendy-Ann P.,2014-09-30 With the potential to impact weather patterns agriculture and habitability of certain regions global warming is a topic of interest to environmentalists scientists as well as farmers around the world The threat of food shortages and famine especially becomes a major concern as a result of recent climate shifts *Impacts of Climate Change on Food Security in Small Island Developing States* discusses the repercussions of a shifting climate on food production and availability in small island nations Comprised of research based chapters on topics relevant to crop management sustainable development and livestock management on island territories this advanced reference work is appropriate for environmental researchers food scientists academicians and upper level students seeking the latest information on agricultural concerns amidst a changing climate OECD Insights Sustainable Development Linking Economy, Society, Environment Strange Tracey,Bayley Anne,2008-12-02 A succinct examination of the

measures while also improving livelihoods in the region The chapters are backed up by detailed case studies which underscore the urgent need for national governments and multilateral agencies to develop strategies to support Southern Africa s societies in adapting to climate change Education and Climate Change Fumiyo Kagawa,David Selby,2010-04-15

There is widespread consensus in the international scientific community that climate change is happening and that abrupt and irreversible impacts are already set in motion What part does education have to play in helping alleviate rampant climate change and in mitigating its worst effects In this volume contributors review and reflect upon social learning from and within their fields of educational expertise in response to the concerns over climate change They address the contributions the field is currently making to help preempt and mitigate the environmental and social impacts of climate change as well as how it will continue to respond to the ever changing climate situation With a special foreword by Desmond Tutu Archbishop Emeritus of Cape Town Exploring the link between poverty and human rights in Africa Edited by Ebenezer Durojaye and Gladys Mirugi-Mukundi,2020-01-01

About the publication This book addresses poverty one of the important issues confronting Africa from a multi disciplinary approach With contributions from eminent scholars from diverse backgrounds the book explores poverty from a human rights perspective Its central message is that poverty is not necessarily a failure on the part of an individual but rather caused by the actions or inactions of governments which are often exacerbated by structural inequalities in many African societies This in turn requires a more pragmatic approach grounded in respect for human rights Exploring the link between poverty and human rights in Africa will be useful to researchers policymakers students activists and others interested in addressing poverty Table of Contents PREFACE viii ACKNOWLEDGMENTS x CONTRIBUTORS xi

Water, Climate Change and the Boomerang Effect Larry Swatuk, Lars Wirkus, 2018-07-27 In line with COP21 agreements state led climate change mitigation and adaptation actions are being undertaken to transition to carbon neutral green

economies However the capacity of many countries for action is limited and may result in a boomerang effect defined as the unintended negative consequences of such policies and programmes on local communities and their negative feedbacks on the state To avoid this effect there is a need to understand the policy drivers decision making processes and impacts of such action in order to determine the ways and means of minimizing negative effects and maximizing mutually beneficial policy outcomes This book directly engages the policy debates surrounding water resources and climate actions through both theoretical and comparative case studies It develops the boomerang effect concept and sets it in relation to other conceptual tools for understanding the mixed outcomes of state led climate change action for example backdraft effect and maldevelopment It also presents case studies illustrative of the consequences of ill considered state led policy in the water sector from around the world These include Africa China South Asia South America the Middle East Turkey and Vietnam and examples of groundwater hydropower development and forest hydrology where there are often transboundary consequences of a state s policies and actions In this way the book adds empirical and theoretical insights to a still developing debate regarding the appropriate ways and means of combating climate change without undermining state and social development

Ecological Changes in the Zambezi River Basin Mzime Ndebele-Murisa, 2021-01-11 This book provides an analysis of the ecological conditions and ecosystem goods and services of the Zambezi River Basin ZRB the fourth largest river in Africa Various environmental and anthropogenic factors inclusive of climate environmental flows hydrology morphology pollution and land use changes among others and their interactions are considered as drivers of the river ecosystems The impacts of these drivers on aquatic biota river ecological integrity and the livelihoods of surrounding communities are analysed within the socio economic policy context The book goes beyond the usual inventories and basic research by using the comparative research method CRM in a trans disciplinary manner This CRM analytical approach in this book seeks to interrogate the differences or similarities in socio economic systems livelihoods ecological systems ecosystem goods and services their usage and management under the seemingly different cultural socio economic conditions expected across borders that are within the ZRB The multidisciplinary approach also connects the typical ecological research with social dimensions in a holistic manner The book therefore provides empirical and research based evidence to support strategic planning and policy development in the wake of ecological changes that nations and indeed regions such as the ZRB are grappling with while seeking to sustainably manage precious river systems

Alcamo, 2008-10-10 As scientists and policymakers try to come to grips with problems such as climate change and risks to biodiversity they turn more and more frequently to the method of scenario analysis to better understand the future of these problems Over the last few years scenario analysis has become one of the key tools for bridging environmental science and policy This is the first book to sum up the current practice of environmental scenario analysis and to propose directions for improving its quality and effectiveness Chapters are written by an international group of distinguished scenario experts and provide an excellent starting basis for first time scenario practitioners as well as a collection of new ideas on improving scenario practice for experienced scenario analysts Comprehensive coverage and overview on environmental scenario analysis from a team of international experts First book to address key contemporary issues involved with environmental scenario analysis Gives guidelines for best practices Benefits Excellent starting base for first time scenario practitioners Helps the reader to interpret scenarios and to place them into the correct context Handbook of Environmental Health, Volume I Herman Koren, Michael S. Bisesi, 2002-07-29 The Handbook of Environmental Health Biological Chemical and Physical Agents of Environmentally Related Disease Volume 1 Fourth Edition includes twelve chapters on a variety of topics basically following a standard chapter outline where applicable with the exception of chapters 1 2 and 12 The outline is as follows 1 Background and status 2 Sc *The Eco-Social Polity?* Ekaterina Domorenok, Paolo Graziano, Katharina Zimmermann, 2025-05-30 The devastating effects of climate change are undeniable Fires rage and waters rise in every corner of the globe In light of these changes to our planet the issue of social and environmental wellbeing has gained prominent attention from both academia and policy makers Scholarly research on the interaction between social and employment policy domains has flourished Academics now reflect on the different aspects of environmental and social protection ecological and social risks and the costs of climate change sustainable welfare and new social movements prompted by green transitions This book provides a vital contribution to the emerging research agenda It brings together scholars from interconnected disciplines to discuss the eco social debate providing a critical overview on extant scholarship and reflecting on future research pathways on the eco social nexus from a variety of analytical perspectives **Global Perspectives of Toxic Metals in Bio Environs** Mohammad Aneesul Mehmood, Rouf Ahmad Bhat, Gowhar Hamid Dar, 2025-07-11 This book explores recent advances in heavy metal contamination research in a global context and focusses on the role of recent technologies like recombinant bioremediation phytoremediation DNA technology and nanotechnology to provide sustainable managing strategies to mitigate adverse environmental and health impacts Many heavy metals are used in industrial and commercial sectors including iron zinc tin lead copper tungsten cadmium arsenic chromium thallium and lead which when disposed in the natural environment lead to serious threats to ecological balance in biotic systems and threaten vulnerable human populations Currently global scientific communities are very worried about the detrimental health effects of these heavy

metals and their adverse effects on almost all biological systems Scientific research has recorded some alarming adverse impacts of heavy metals on biota like carcinogenesis mutagenesis teratogenesis allergic interactions endocrine disruption bone marrow damage osteoporosis and immune system damage This book is therefore timely and will be of interest to researchers students professors and policymakers examining toxic heavy metals in the environment and their adverse health impacts
