Public Procurement and Multilateral Development Banks Sope Williams-Elegbe, 2017-03-23 The multilateral development banks cumulatively channel billions of dollars annually in development assistance to borrower countries This finance is usually spent through processes that incorporate the public procurement regulations of the banks and it is often a condition of this finance that the funds must be spent using the procurement regulations of the lender institution This book examines the issues and challenges raised by procurement regulation in the multilateral development banks The book examines the history of procurement regulation in the banks the tripartite relationship created between the banks borrowers and contractors in funded procurements the procurement documents and procurement cycle as well as how the banks ensure competition and value for money in funded procurements The book also examines the banks approach to sustainability concerns in public procurement such as environmental social or industrial concerns as well as how the banks address the issue of corruption and fraud in funded contracts Another issue that is addressed by this book is how the banks have implemented the aid effectiveness agenda It will be seen that the development banks have undertaken steps to harmonise their policies and practices increased borrower procurement capacity taken steps to reduce the tying of aid and play an important role in the reform of borrower procurement systems all in an effort to improve the effectiveness of development finance The book also considers the contractual and other remedies that are available to parties that may be aggrieved as a result of a funded procurement The book analyses compares and contrasts the legal practical and institutional approaches to procurement regulation in the World Bank the Inter American Development Bank the African Development Bank the Asian Development Bank and the European Bank for Reconstruction and Development *Building Commitment to Reform through Strategic Communication* Cecilia Caba ero-Verzosa, Helen R. Garcia, 2009-10-06 Strategic communication is a powerful tool for creating broad based support for reform and change initiatives Much has been written about why communication matters in reform efforts but there is scant material available to help those who manage reforms apply communication concepts and approaches to their own programs and policy reform initiatives Building Commitment to Reform through Strategic Communication attempts to bridge that gap The authors present a pragmatic and systematic approach for reformers ready to use communication strategically to achieve their reform goals The Five Communication Management Decision Tool helps reformers and their teams develop a framework for their communication strategies This decision tool helps managers see change initiatives through the eyes of those who will be affected by the reforms When the decision tool is used in the early stages of the development of change programs reformers gain an even deeper understanding of the stakeholders perspectives on the reforms which influence stakeholder opposition or support for them Such understanding will not only be instructive but possibly transformative for both change agents and those stakeholders whose support is critical to the success of reform Reform agents may recognize the source of stakeholder resistance and be able to revise reform goals and redesign

change interventions Stakeholders who have a shared understanding of why the status quo is not acceptable and change is necessary are more likely to create coalitions of committed allies and supporters who will work together to achieve reform goals This workbook illustrates how the decision tool can be used for various types of change and reform initiatives from policy reform to country and donor partnership agreements to sectoral reforms Tested and used in learning interventions across cultures regions and sectors the tool has been used successfully by teams in government nongovernmental organizations the business sector and donor agencies The book will be of great interest to readers working in all of these areas

Governance Reform Under Real-World Conditions Sina Odugbemi, Thomas Jacobson, 2008-06-13 Although necessary and often first rate technocratic solutions alone have been ineffective in delivering real change or lasting results in governance reforms This is primarily because reform programs are delivered not in controlled environments but under complex diverse sociopolitical and economic conditions Real world conditions In political societies ownership of reform programs by the entire country cannot be assumed public opinion will not necessarily be benign and coalitions of support may be scarce or nonexistent even when intended reforms really will benefit those who need them most While the development community has the technical tools to address governance challenges experience shows that technical solutions are often insufficient Difficulties arise when attempts are made to apply what are often excellent technical solutions Human beings either acting alone or in groups small and large are not as amenable as are pure numbers and they cannot be ignored In the real world reforms will not succeed and they will certainly not be sustained without the correct alignment of citizens stakeholders and voice Governance Reform under Real World Conditions Citizens Stakeholders and Voice is a contribution to efforts to improve governance systems around the world particularly in developing countries The contributors who are academics and development practitioners provide a range of theoretical frameworks and innovative approaches and techniques for dealing with the most important nontechnical or adaptive challenges that impede the success and sustainability of reform efforts The editors and contributors hope that this book will be a useful guide for governments think tanks civil society organizations and development agencies working to improve the ways in which governance reforms are implemented around the world
