Overspent American Upscaling Downshifting And The New Consumer:

The Overspent American Juliet B. Schor, 1999-04-07 The Overspent American explores why so many of us feel materially dissatisfied why we work staggeringly long hours and yet walk around with ever present mental wish lists of things to buy or get and why Americans save less than virtually anyone in the world Unlike many experts Harvard economist Juliet B Schor does not blame consumers lack of self discipline Nor does she blame advertisers Instead she analyzes the crisis of the American consumer in a culture where spending has become the ultimate social art The Overspent American Juliet Schor, 1998 *Consumer Tribes* Avi Shankar, Bernard Cova, Robert Kozinets, 2012-06-25 Marketing and consumer research has traditionally conceptualized consumers as individuals who exercise choice in the marketplace as individuals not as a class or a group However an important new perspective is now emerging that rejects the individualistic view and focuses on the reality that human life is essentially social and that who we are is an inherently social phenomenon It is the tribes the many little groups we belong to that are fundamental to our experience of life Tribal Marketing shows that it is not individual consumption of products that defines our lives but rather that this activity actually facilitates meaningful social relationships The social links social relationships are more important than the things brands etc The aim of this book is therefore to offer a systematic overview of the area that has been defined as cultures of consumption consumption microcultures brand cultures brand tribes and brand communities It is though these that students of marketing and marketing practitioners can begin to genuinely understand the real drivers of consumer behaviour It will be essential to everyone who needs to understand the new paradigm in consumer research brand management and communications management *Hooked on Growth* Douglas E. Booth, 2004-05-03 Challenging conventional wisdom on the virtues of a consumer economy this provocative book explores the nexus between growth and environment sustainability The miracle of the modern affluent economy is an ever swelling cornucopia of consumer goods leading to expanding consumption as the essential underpinning of economic growth in more and more parts of the globe Douglas Booth contends that expansion in this form amounts to an addiction Are we as a society hooked on economic growth of a kind that carries with it significant threats to the natural environment A critical dilemma for the modern economy is that growth is required to prevent the pain of unemployment As growth continues the environment declines but if growth slows unemployment rises We seem trapped in a spiraling predicament like that of the addict This accessible work explores whether getting unhooked from growth to meet the needs of the environment is possible Giving the environment priority over growth may seem to some like a radical idea yet the author argues that it can be accomplished using marketable emissions allowances transferable development rights and other tools popular with conventional economists It can also be achieved by creating more interesting and environmentally friendly urban landscapes less beholden to the automobile The key problem a less growth oriented society will face is ensuring that everyone who wants employment can find it This will require something that many people wish for anyway a shorter workweek More leisure a higher quality

environment and more attractive cities and towns are the potential rewards of a less consumption oriented society Yet powerful economic interests that benefit from a high growth economy are arrayed against changes in the status quo Under what circumstances can the power of special interests be overcome in the name of environmental conservation This is the author's critical final question as he offers a clear path to a sustainable economic and environmental future

Critical Marketing Pauline Maclaran, Michael Saren, Christina Goulding, Richard Elliott, Miriam Caterall, 2012-06-25 Marketing is still widely perceived as simply the creator of wants and needs through selling and advertising and marketing theory has been criticized for not taking a more critical approach to the subject This is because most conventional marketing thinking takes a broadly managerial perspective without reflecting on the wider societal implications of the effects of marketing activities In response this important new book is the first text designed to raise awareness of the critical ethical social and methodological issues facing contemporary marketing Uniquely it provides The latest knowledge based on a series of major seminars in the field The insights of a leading team of international contributors with an interdisciplinary perspective A clear map of the domain of critical marketing A rigorous analysis of the implications for future thinking and research For faculty and upper level students and practitioners in Marketing and those in the related areas of cultural studies and media Critical Marketing will be a major addition to the literature and the development of the subject

Beyond the Consumption Bubble Karin Ekström, Kay Glans, 2010-12-14 This book brings together a diverse set of expert scholars to enliven and sharpen the debate about the ways in which consumption affects society today Research on consumption can shed light on many fundamental questions such as the character of society including social and cultural dimensions the relations between the generations dependency of technology and the risks involved the rise of Asia and its potential consumption preferences the question of whether we must continuously increase our consumption to avoid a recession and whether this is ecologically sustainable

Foodies Josee Johnston, Shyon Baumann, 2009-12-04 This important new cultural analysis tells two stories about food The first depicts good food as democratic Foodies frequent hole in the wall ethnic eateries appreciate the pie found in working class truck stops and reject the snobbery of fancy French restaurants with formal table service The second story describes how food operates as a source of status and distinction for economic and cultural elites indirectly maintaining and reproducing social inequality While the first storyline insists that anybody can be a foodie the second asks foodies to look in the mirror and think about their relative social and economic privilege By simultaneously considering both of these stories and studying how they operate in tension a delicious sociology of food becomes available perfect for teaching a broad range of cultural sociology courses
